Anatomy of the Pancreas
Development of the Pancreas and Response to Disease p. 3
Congenital Anomalies of the Pancreas and the Extrahepatic Bile Ducts p. 9
Surgical Vascular Anatomy and Histology p. 19
Physiology and Pathophysiology of the Pancreatic Functions
Pancreatic Exocrine Secretion p. 31
Physiology and Pathophysiology of Endocrine Pancreatic Secretion p. 37
Sphincter of Oddi Physiology and Pathophysiology p. 49
Clinical Standards of Diagnostic Measures
Ultrasound p. 61
Contrast-Enhanced CT and MRI p. 67
Endoscopic Retrograde Cholangiopancreatography p. 75
Fine-Needle Aspiration Biopsy of the Pancreas p. 85
FOG-PET and PET/CT in Pancreatic Cancer p. 97
Laboratory Diagnosis of Exocrine and Endocrine Dysfunctions in Inflammatory and Neoplastic Lesions p. 107
Guidelines, Clinical Evaluation, Short Track p. 119
Acute Pancreatitis
Etiology and Epidemiology of Acute Pancreatitis p. 131
Epidemiology and Intervention During the Clinical Course of Biliary Acute Pancreatitis p. 143
Pathogenesis and Pathophysiology of Acute Pancreatitis p. 153
Natural Course of Acute Pancreatitis p. 163
Classification of Severe Acute Pancreatitis p. 173
Biochemical Diagnosis, Staging, and Prediction p. 187
Imaging Diagnosis of Acute Pancreatitis 7 p. 193
Nonsurgical Management of Acute Pancreatitis p. 203
Indications for the Surgical Management of Necrotizing Pancreatitis p. 277
Debridement and Closed Packing for the Treatment of Necrotizing Pancreatitis p. 279
Necrosectomy and Redressing p. 225
Necrosectomy and Closed Lavage p. 237
Infected Necrosis - Minimally Invasive Necrosectomy p. 247
Benefits and Limitations of Necrosectomy p. 249
Surgical Management of Pancreatic Abscess p. 253
Surgical Management of Pseudocysts after Acute Pancreatitis p. 259
Interventional Management of Pancreatic Fluid Collections and Abscesses p. 277
Pancreatic and Intestinal Fistulas p. 287
Late Outcome after Necrosectomy p. 289
Chronic Pancreatitis
Mechanisms of Pain in Chronic Pancreatitis p. 295
Natural Course of Chronic Pancreatitis p. 307
