Page migration in dynamic networks p. 1
Knot theory, Jones polynomial and quantum computing p. 15
Interactive algorithms 2005 p. 26
Some computational issues in membrane computing p. 39
The generalization of Dirac's theorem for hypergraphs p. 52
On the communication complexity of co-linearity problems p. 57
An invitation to play p. 58
The complexity of satisfiability problems: refining Schaefer's theorem p. 71
On the number of random digits required in Monte Carlo integration of definable functions p. 83
Pure nash equilibria in games with a large number of actions p. 95
On the complexity of depth-2 circuits with threshold gates p. 107
Isomorphic implication p. 119
Abstract numeration systems and tilings p. 131
Adversarial queueing model for continuous network dynamics p. 144
Coloring sparse random k-colorable graphs in polynomial expected time p. 156
Regular sets of higher-order pushdown stacks p. 168
Linearly bounded infinite graphs p. 180
Basic properties for sand automata p. 192
A bridge between the asynchronous message passing model and local computations in graphs p. 212
Reconstructing an ultrametric galled phylogenetic network from a distance matrix p. 224
New resource augmentation analysis of the total stretch of SRPT and SJF in multiprocessor scheduling p. 236
Approximating polygonal objects by deformable smooth surfaces p. 248
Basis of solutions for a system of linear inequalities in integers: computation and applications p. 260
Asynchronous deterministic rendezvous in graphs p. 271
Zeta-dimension p. 283
Online interval coloring with packing constraints p. 295
Separating the notions of self- and autoreducibility p. 308
Fully asynchronous behavior of double-quiescent elementary cellular automata p. 316
Finding exact and maximum occurrences of protein complexes in protein-protein interaction graphs p. 328
Matrix and graph orders derived from locally constrained graph homomorphisms p. 340
Packing weighted rectangles into a square p. 352
Nondeterministic graph searching: from pathwidth to treewidth p. 364
Goals in the propositional horn language are monotone Boolean circuits p. 376
Autoreducibility, mitoticity, and immunity p. 387
Canonical disjoint NP-pairs of propositional proof systems p. 399
Complexity of DNF and isomorphism of monotone formulas p. 410
The expressive power of two-variable least fixed-point logics p. 422
Languages representable by vertex-labeled graphs p. 435
On the complexity of mixed discriminants and related problems p. 447
Two logical hierarchies of optimization problems over the real numbers p. 459
Algebras as knowledge structures p. 471
Combining self-reducibility and partial information algorithms p. 483
Complexity bounds for regular games p. 495
Basic mereology with equivalence relations p. 507
Online and dynamic recognition of squarefree strings p. 520
Shrinking restarting automata p. 532
Removing bidirectionality from nondeterministic finite automata p. 544
Generating all minimal integral solutions to monotone [actual symbol not reproducible], [actual symbol not reproducible]-systems of linear, transversal and polymatroid inequalities p. 556
On the parameterized complexity of exact satisfiability problems p. 568
Approximating reversal distance for strings with bounded number of duplicates p. 580
Random databases and threshold for monotone non-recursive datalog p. 591
An asymptotically optimal linear-time algorithm for locally consistent constraint satisfaction problems p. 603
Greedy approximation via duality for packing, combinatorial auctions and routing p. 615
Tight approximability results for the maximum solution equation problem over $\mathbb{Z}$[subscript $p$] p. 628
The complexity of model checking higher order fixpoint logic p. 640
An efficient algorithm for computing optimal discrete voltage schedules p. 652
Inverse monoids: decidability and complexity of algebraic questions p. 664
Dimension is compression p. 676
Concurrent Automata vs. asynchronous systems p. 686
Completeness and degeneracy in information dynamics of cellular automata p. 699
Strict language inequalities and their decision problems p. 708
Event structures for the collective tokens philosophy of inhibitor nets p. 720
An exact 2.9416 superscript n algorithm for the three domatic number problem p. 733
D-width: a more natural measure for directed tree width p. 745
On beta-shifts having arithmetical languages p. 757
A BDD-representation for the logic of equality and uninterpreted functions p. 769
On small hard leaf languages p. 781
Explicit inapproximability bounds for the shortest superstring problem p. 793
Stratified Boolean grammars p. 801
