Language modeling experiments with random forests p. 1
The role of speech in multimodal human-computer interaction p. 2
Why is the recognition of spontaneous speech so hard? p. 9
On the acoustic components in multimedia presentations p. 23
Fusing data streams in continuous audio-visual speech recognition p. 33
Speech based user interface for users with special needs p. 45
Automatic construction of a valency lexicon of Czech adjectives p. 56
WebTranscribe - an extensible Web-based speech annotation framework p. 61
Learning syntactic patterns using boosting and other classifier combination schemas p. 69
Text classification with tournament methods p. 77
New mete-grammar constructs in Czech language parser synt p. 85
Anaphora in Czech : large data and experiments with automatic anaphora resolution p. 93
Valency lexicon of Czech verbs VALLEX : recent experiments with frame disambiguation p. 99
AARLISS - an algorithm for anaphora resolution in long-distance inter sentential scenarios p. 107
Detection and correction of malapropisms in Spanish by means of Internet search p. 115
The Szeged treebank p. 123
Automatic lemmatizer construction with focus on OOV words lemmatization p. 132
Modeling syntax of free word-order languages : dependency analysis by reduction p. 140
Morphological meanings in the Prague dependency treebank 2.0 p. 148
Automatic acquisition of a Slovak lexicon from a raw corpus p. 156
Equilibrium points of single-layered neural networks with feedback and applications in the analysis of text documents p. 164
A syntax and semantics linking algorithm for the Chinese language p. 171
Fuzzy information retrieval indexed by concept identification p. 179
A theme allocation for a sentence based on head driven patterns p. 187
A hybrid approach to statistical language modeling with multilayer perceptrons and unigrams p. 195
Supervised and unsupervised speaker adaptation in large vocabulary continuous speech recognition of Czech p. 203
Modelling lexical stress p. 211
The sound database formation for the allophone-based model for English concatenative speech synthesis p. 219
Using artificially reverberated training data in distant-talking ASR p. 226
French-German bilingual acoustic modeling for embedded voice driven applications p. 234
Sinusoidal modeling using wavelet packet transform applied to the analysis and synthesis of speech signals p. 241
Speaker identification based on subtractive clustering algorithm with estimating number of clusters p. 249
On modelling glottal stop in Czech text-to-speech synthesis p. 257
Analysis of the suitability of common corpora for emotional speech modeling in standard Basque p. 265
Discrete and fluent voice dictation in Czech language  p. 273
Unit selection for speech synthesis based on acoustic criteria  p. 281
Generative model for decoding a phoneme recognizer output  p. 288
Diction based prosody modeling in table-to-speech synthesis  p. 294
Phoneme based acoustics keyword spotting in informal continuous speech  p. 302
Explicit duration modelling in HMM/ANN hybrids  p. 310
Mapping the speech signal onto electromagnetic articulography trajectories using support vector regression  p. 318
Automatic transcription of numerals in inflectional languages  p. 326
Experimental evaluation of tree-based algorithms for intonation breaks representation  p. 334
Compact representation of speech using 2-D cepstrum - an application to Slovak digits recognition  p. 342
An alternative way of semantic interpretation  p. 348
Robust rule-based method for automatic break assignment in Russian texts  p. 356
Introduction of improved UWB speaker verification system  p. 364
Formal prosodic structures and their application in NLP  p. 371
The VoiceTRAN speech-to-speech communicator  p. 379
Cluster analysis of railway directory inquire dialogs  p. 385
A framework for rapid multimodal application design  p. 393
Language-independent communication using icons on a PDA  p. 404
Software tutors for dialogue systems  p. 412
Questions in Estonian information dialogues : form and functions  p. 420
Reducing question answering input data using named entity recognition  p. 428
Annotating structural constraints in discourse corpora  p. 435
A passage retrieval system for multilingual question answering  p. 443
Error analysis of dialogue act classification  p. 451
