Harmony: the art of reconciliation p. 1
A theory of noninterference for the [pi]-calculus p. 2
Typed processes in untyped contexts p. 19
Model-based testing of cryptographic protocols p. 33
A general name binding mechanism p. 61
Types for security in a mobile world p. 75
History-based access control for distributed processes p. 98
Programming cryptographic protocols p. 116
A framework for analyzing probabilistic protocols and its application to the partial secrets exchange p. 146
A formal semantics for protocol narrations p. 163
web[pi] at work p. 182
Concurrency among strangers p. 195
The modelling and analysis of OceanStore elements using the CSP dependability library p. 230
A practical formal model for safety analysis in capability-based systems p. 248
Mixin modules for dynamic rebinding p. 279
A distributed object-oriented language with session types p. 299
Engineering runtime requirements-monitoring systems using MDA technologies p. 319
Automated analysis of infinite scenarios p. 334
Namespace logic: a logic for a reflective higher-order calculus p. 353
