

Globalization, Specialization and Innovation Dynamics	p. 1
Introduction	p. 1
Approaches in Modern Macroeconomics	p. 3
Human Capital, Physical Capital and Innovations in Open Economies	p. 7
A Critique of the Heckscher-Ohlin-Samuelson Approach	p. 11
Solving the Leontief Paradox?	p. 14
Variations on the Solow Model: Some New Insights for a Monetary Economy	p. 20
A Generalization of the Solow Growth Model	p. 20
Aspects of Empirical Analysis of Economic Development	p. 28
Technological Progress and the Long Run Price Level	p. 34
Process Innovations	p. 34
The Model	p. 36
True Long Run Equilibrium in the Money Market	p. 36
Long Run Growth Perspective	p. 38
Conclusions for Analysis of Process Innovations in a Monetary Economy	p. 42
Solow Model and Role of Money for Growth	p. 42
Monetary Growth Model and Tobin Paradox	p. 52
Technological Progress Cycles	p. 55
Equilibrium and Terms of Trade Aspects in a Simple Open Economy Growth Model	p. 57
International Macroeconomics, FDI and Fiscal and Monetary Policy	p. 58
Long Run Phillips Curve in a Growing Economy	p. 62
Variable Output Elasticity of Capital	p. 63
Foreign Direct Investment and Innovation	p. 65
Innovation Dynamics and Multinational Companies	p. 65
Modified Multiplier in Macro Model with FDI Outflows	p. 77
Output Dynamics: Interaction of the Demand Side and the Supply Side	p. 81
Growth Accounting Under Unemployment and Okun's Law	p. 82
Innovation, Trade and Foreign Investment	p. 86
Conclusions	p. 92
Aggregation in a Two-Sector Growth Model: A Modified Solow Approach with Cobb-Douglas Production Functions	p. 94
Two Sector Model	p. 98
Labor Markets with Tradables and Nontradables	p. 99
Product Innovations with Schumpeterian Intermediate Products: A Simple Formula	p. 102
Medium-term Output and Wage Policies in an Open Economy	p. 103
Savings, Investment and Growth: New Approaches for Macroeconomic Modelling	p. 109
Introduction	p. 109
A Medium-term Keynes-Solow Model	p. 111
Capital Accumulation Dynamics and Profit Maximization	p. 113
Choosing a Consistent Investment Function and a New Consumption Function	p. 115
Multiplier Analysis	p. 117
Conclusions and Possible Extensions	p. 126

Economic Integration, Technological Progress and Growth	p. 129
Rich Countries vs. Poor Countries and Economic Integration	p. 129
Set-up of the Model	p. 132
Convergence in a Hybrid Growth Model with Trade and R&D;	p. 134
Profit Maximization in the Hybrid Growth Model	p. 137
Asymmetric Foreign Direct Investment in a Two-Country Growth Model	p. 138
Policy Conclusions	p. 140
Basic Neoclassical Model	p. 142
General Approach and Simulations	p. 142
Impact of the Real Exchange Rate on Trade, Structural Change and Growth	p. 146
Introduction	p. 146
Reputation, Market Size and Relative Price Effects: A Quasi-Balassa-Samuelson Effect	p. 147
Real Exchange Rate Dynamics and Economic Effects	p. 150
Real Exchange Rate and Trade	p. 150
Real Exchange Rate and Structural Change	p. 150
Real Exchange Rate and Growth	p. 152
Growth and FDI in a Modified Neoclassical Framework	p. 152
Negative International Spillovers?	p. 157
Real Effective Exchange Rate Dynamics in Selected EU Countries	p. 158
Wages, Prices and the Real Exchange Rate	p. 158
Towards an Integrated Macroeconomic Approach	p. 159
Medium Term Approach to Product Innovations, Output and the Exchange Rate	p. 165
Economic Catching-up and Long Term Real Exchange Rate Dynamics	p. 172
Policy Implications	p. 176
Macroeconomic Aspects of Opening up, Unemployment, Growth and Transition	p. 178
Introduction	p. 178
Growth, Trade and Innovation	p. 181
New Production Function for Open Economies	p. 181
Towards an Integrated Macroeconomic Approach	p. 183
Growth, Resource Dynamics, Balassa-Samuelson Effects and Unemployment	p. 196
Growth, Natural Resources and Economic Welfare	p. 196
The Balassa-Samuelson Effect, Unemployment and Exports	p. 197
Wage Bargaining as Inherent Source of Unemployment?	p. 200
Product Innovation and Macroeconomic Developments: Schumpeter and the Mundell-Fleming Model	p. 206
The Role of Risk and Innovation	p. 206
Endogenous Product Innovations in Countries with Similar Development Levels	p. 207
Conclusions and Policy Implications	p. 208
Maximization of Total Quasi-Income of Workers through Trade Unions	p. 210
Mathematical Appendix	p. 213
Reflections on EU Eastern Enlargement	p. 215

Fiscal Multiplier in a Hybrid Approach	p. 221
Reconsidering Aggregate Output in a Two-Sector Approach	p. 221
Productivity Shocks, Innovations, Stock Market Dynamics and Growth	p. 224
Introduction	p. 224
Traditional and New Approaches to the Exchange Rate and Stock Market Dynamics	p. 229
Stylized Facts of Exchange Rates and Stock Market Prices	p. 229
A Short-Term Analysis of Financial Market Dynamics and Technology Shocks	p. 237
Hybrid Model: Combining Interest Parity and Augmented Money Market Equilibrium	p. 243
Capital Asset Pricing Model and Product Innovations	p. 245
Consumption, Volatility and Growth	p. 249
Policy Issues and Conclusions	p. 251
Slope of Equilibrium Lines	p. 253
International Bonds Market Integration, Interest Rates and Stock Market Volatility	p. 254
Innovation Dynamics and Optimum Growth	p. 258
Introduction	p. 258
Endogenous Growth, Innovation and Maximum Consumption per Capita	p. 261
Optimum Endogenous Growth	p. 261
Role of Government Consumption	p. 262
New Political Economy	p. 263
High Population Growth vs. Ageing Societies	p. 265
Unemployment and Growth	p. 266
Optimum Growth and Endogenous Growth Modeling in Open and Closed Economies	p. 267
Biased Technological Progress and Optimum Growth	p. 272
Policy Implications	p. 273
Optimum Quantity of Money	p. 276
Specialization, Technological Progress and Factor Price Ratios	p. 277
Endogenous Progress in the Capital Goods Sector	p. 278
Simple Differential Equation and Bernoulli Differential Equation	p. 280
Trade, Structural Change and Growth in an Open Monetary Economy	p. 282
Introduction	p. 282
Exchange Rate Dynamics, Relative Prices, Employment and Growth	p. 284
Nominal Exchange Rate, Real Exchange Rate and True Long Run Money Market Equilibrium	p. 284
Real Exchange Rate, Growth Path and Steady State	p. 289
Investment, Real Exchange Rate and Employment	p. 293
Technology, Exchange Rate Changes and the Relative Tradable Price	p. 296
Real Exchange Rate Dynamics and Economic Effects	p. 299
Statistical Measures of Structural Change	p. 302
Indicators Measuring Structural Change	p. 304
Innovations in the Digital Economy: Promotion of R&D; and Growth in Open Economies	p. 305

Introduction	p. 305
Innovations and New Economic Structures in the Digital Economy	p. 308
Selected Innovation Traits in OECD Countries	p. 308
Innovation System and Innovation Record	p. 320
High Technology, ICT Growth and Modernization of the Economic System	p. 322
Theory of Innovation Policy	p. 331
The Standard Case	p. 331
Intermediate Traded Products, R&D; Subsidies and Rent-Shifting	p. 333
Macroeconomic Approach: A Schumpeter-Mundell-Flemming Model	p. 336
Empirical Insights from the Analysis of Innovation, Growth and Structural Change	p. 339
Policy Conclusions	p. 340
General Policy Conclusions for Innovation Policy in Open Economies	p. 340
Specific Policy Conclusions for Germany	p. 341
R&D; Promotion for Medium Technologies and High-tech Industry	p. 341
Skill Upgrading and Reform of the Education System	p. 342
Problems with Immigration of Unskilled Labour	p. 342
Improving Knowledge Transfer from University to the Business Community	p. 343
Keeping Skilled Workers and Innovation Leadership in the Region	p. 344
A European Policy Perspective	p. 345
Optimum Product Innovation under Uncertainty	p. 346
Product Innovations and Network Effects in a Simple Model	p. 347
NACE (EU classification) rev. 1.1 Classification at the 2-digit level (in parts)	p. 351
Model for Digital Innovation	p. 351
EU Innovation Policy: Analysis and Critique	p. 358
Introduction	p. 358
Innovation Policy in the EU	p. 360
Innovation Dynamics in OECD Countries	p. 361
Innovation, Specialization and Growth: Empirical Analysis for EU-15 and USA	p. 361
Comparative Innovation Dynamics	p. 362
Acceleration of Innovation Dynamics	p. 367
Specialization in Innovation and ICT Network Perspectives	p. 369
Openness, Taxation and Growth	p. 374
Recommendations for Future EU Innovation Policy	p. 376
Financial Market Integration, Interest Rates and Economic Development	p. 379
Introduction	p. 379
Financial Market Integration in the EU	p. 386
From Basic Theory to Endogenous Growth Approaches	p. 386
Current Account Dynamics: A New Approach	p. 390
Monetary Integration, Financial Market Integration and Welfare Effects	p. 392
Integration of Financial Markets in the Euro Zone and Global Dynamics	p. 397
Policy Conclusions	p. 398

FDI and Information and Communication Technology in the Dornbusch Model	p. 400
Basics of the Dornbusch Model	p. 400
The Modified Dornbusch Model	p. 401
Conclusions	p. 411
Aspects of Transition and Trend Growth in a Setup with Technology Shifts	p. 413
Uncertainty, Savings and Product Innovations	p. 413
A Macro-Model with Unemployment and Endogenous Taxation	p. 415
References	p. 418
List of Figures	p. 426
List of Tables	p. 431
