Plenary Lectures

Compatible Discretizations in Two Dimensions p. 3
Finite Element Approximation of the Three Field Formulation of the Elasticity Problem Using Stabilization p. 21
Convergence of Adaptive Wavelet Methods for Goal-Oriented Error Estimation p. 39
Quadratic Programming and Scalable Algorithms for Variational Inequalities p. 62
Discontinuous Galerkin Methods for Friedrichs' Systems p. 79
Highly Oscillatory Quadrature: The Story so Far p. 97
The 3D Inverse Electromagnetic Scattering Problem for a Coated Dielectric p. 119
Functional Approach to Locally Based A Posteriori Error Estimates for Elliptic and Parabolic Problems p. 135
Finite Element Approximation of 2D Parabolic Optimal Design Problems p. 151

Contributed Lectures

Accurate Finite Volume Solvers for Fluid Flows
3D Free Surface Flows Simulations Using a Multilayer Saint-Venant Model. Comparisons with Navier-Stokes Solutions p. 181
Some Well-Balanced Shallow Water-Sediment Transport Models p. 190
Finite Volume Solvers for the Shallow Water Equations Using Matrix Radial Basis Function Reconstruction p. 207

Adaptive Methods

On Numerical Schemes for a Hierarchy of Kinetic Equations p. 217
Computational Aspects of the Mesh Adaptation for the Time Marching Procedure p. 225
On the Use of Slope Limiters for the Design of Recovery Based Error Indicators p. 233

A Posteriori Error Estimation

On a Superconvergence Result for Mixed Approximation of Eigenvalue Problems p. 243
Comparative Study of the a Posteriori Error Estimators for the Stokes Problem p. 252
Error Control for Discretizations of Electromagnetic-Mechanical Multifield Problem p. 260
A Safeguarded Zienkiewicz-Zhu Estimator p. 269

Atmospheric and Ocean

Some Remarks on a Model for the Atmospheric Pressure in Ocean Dynamics p. 279
Computational Time Improvement for Some Shallow Water Finite Volume Models Applying Parallelization and Optimized Small Matrix Computations p. 288

Control

Discretization Error Estimates for an Optimal Control Problem in a Nonconvex Domain p. 299
A Posteriori Estimates for Cost Functionals of Optimal Control Problems p. 308

Convection-Diffusion

Optimization of a Duality Method for the Compressible Reynolds Equation p. 319
Time-Space & Space-Time Elements for Unsteady Advection-Dominated Problems p. 328
On Discontinuity-Capturing Methods for Convection-Diffusion Equations p. 345
A Parallel Multiparametric Gauss-Seidel Method p. 354
A Numerical Scheme for the Micro Scale Dissolution and Precipitation in Porous Media

Degenerate Parabolic Equations: Theory, Numerics and Applications

Discrete Kinetic Methods for a Degenerate Parabolic Equation in Dimension Two

Anisotropic Doubly Nonlinear Degenerate Parabolic Equations

A Multiresolution Method for the Simulation of Sedimentation-Consolidation Processes

Diffusive Relaxation Limit for Hyperbolic Systems

Parallel Algorithms for Nonlinear Diffusion by Using Relaxation Approximation

On a Degenerated Parabolic-Hyperbolic Problem Arising From Stratigraphy

Discontinuous Galerkin

Schwarz Domain Decomposition Preconditioners for Interior Penalty Approximations of Elliptic Problems

Higher Order Semi-Implicit Discontinuous Galerkin Finite Element Schemes for Nonlinear Convection-Diffusion Problems

On Some Aspects of the Discontinuous Galerkin Method

Mixed Discontinuous Galerkin Methods with Minimal Stabilization

Discontinuous Galerkin Finite Element Method for a Fourth-Order Nonlinear Elliptic Equation Related to the Two-Dimensional Navier-Stokes Equations

Domain Decomposition

Fourier Method with Nitsche-Mortaring for the Poisson Equation in 3D

Substructuring Preconditioners for the Bidomain Extracellular Potential Problem

Edge Oriented Interior Penalty Procedures in Computational Fluid Dynamics

A Face Penalty Method for the Three Fields Stokes Equation Arising from Oldroyd-B Viscoelastic Flows

Anisotropic H[superscript 1]-Stable Projections on Quadrilateral Meshes

Continuous Interior Penalty hp-Finite Element Methods for Transport Operators

A Nonconforming Finite Element Method with Face Penalty for Advection-Diffusion Equations

Efficient Multigrid and Data Structures for Edge-Oriented FEM Stabilization

Electromagnetism

Adaptive Methods for Dynamical Micromagnetics

Stability for Walls in Ferromagnetic Nanowire

Continuous Galerkin Methods for Solving Maxwell Equations in 3D Geometries

Exponential Integrators

On the Use of the Gautschi-Type Exponential Integrator for Wave Equations

Positivity of Exponential Multistep Methods

Fluid-Structure Interaction

Stability Results and Algorithmic Strategies for the Finite Element Approach to the Immersed Boundary Method

Heat Transfer and Combustion

A Comparison of Enthalpy and Temperature Methods for Melting Problems on Composite Domains

Qualitative Properties of a Numerical Scheme for the Heat Equation
Modeling Radiation and Moisture Content in Fire Spread p. 601
Fast Multipole Method for Solving the Radiosity Equation p. 609
Numerical Modelling of Kinetic Equations p. 618
Hyperbolic Equations
On a Subclass of Holder Continuous Functions with Applications to Signal Processing p. 629

Modelisation and Simulation of Static Grain Deep-Bed Drying p. 638
Hybrid Godunov-Glimm Method for a Nonconservative Hyperbolic System with Kinetic Relations p. 646
Cell-Average Multiwavelets Based on Hermite Interpolation p. 654
On a General Definition of the Godunov Method for Nonconservative Hyperbolic Systems p. 662
Application to Linear Balance Laws
Sequential Flux-Corrected Remapping for ALE Methods p. 671

hp-Finite Elements
Orthogonal hp-FEM for Elliptic Problems Based on a Non-Affine Concept p. 683
On Some Aspects of the hp-FEM for Time-Harmonic Maxwell's Equations p. 691

Interface Problems
Numerical Simulation of Phase-Transition Front Propagation in Thermoelastic Solids p. 703

The Level Set Method for Solid-Solid Phase Transformations p. 712
Level-Set Methods, Hamilton-Jacobi Equations and Applications
A Non-Monotone Fast Marching Scheme for a Hamilton-Jacobi Equation Modelling Dislocation Dynamics p. 723
A Time-Adaptive Semi-Lagrangian Approximation to Mean Curvature Motion p. 732

Multiscale Methods
Heterogeneous Multiscale Methods with Quadrilateral Finite Elements p. 743
Stabilizing the P[superscript 1]/P[superscript 0] Element for the Stokes Problem via Multiscale Enrichment p. 752
Local Projection Stabilization for the Stokes System on Anisotropic Quadrilateral Meshes p. 770
An Interior Penalty Variational Multiscale Method for High Reynolds Number Flows p. 779
Variational Multiscale Large Eddy Simulation of Turbulent Flows Using a Two-Grid Finite Element or Finite Volume Method p. 788

Issues for a Mathematical Definition of LES p. 796
Stabilized FEM with Anisotropic Mesh Refinement for the Oseen Problem p. 805
Semi-Implicit Multiresolution for Multiphase Flows p. 814
Numerical Simulation of Vortex-Dipole Wall Interactions Using an Adaptive Wavelet Discretization with Volume Penalisation p. 822
Inviscid Flow on Moving Grids with Multiscale Space and Time Adaptivity p. 831

Multiphase Flow
A Relaxation Method for a Two Phase Flow with Surface Tension p. 843
Extension of Interface Coupling to General Lagrangian Systems p. 852
