Knowledge-driven hyperlinks : linking in the wild p. 1
Scrutable adaptation : because we can and must p. 11
Adapting NLP to adaptive hypermedia p. 20
Cross-technique mediation of user models p. 21
Authoring adaptive learning designs using IMS LD p. 31
Ways of computing diverse collaborative recommendations p. 41
Addictive links : the motivational value of adaptive link annotation in educational hypermedia p. 51
An adaptive personalized recommendation strategy featuring context sensitive content adaptation p. 61
An empirical study about calibration of adaptive hints in Web-based adaptive testing environments p. 71
Combining adaptive hypermedia techniques and ontology reasoning to produce dynamic personalized news services p. 81
Social navigation support in a course recommendation system p. 91
Cooperating search communities p. 101
Temporal rules for predicting user navigation in the mobile Web p. 111
The value of QoE-based adaptation approach in educational hypermedia : empirical evaluation p. 121
GLAM : a generic layered adaptation model for adaptive hypermedia systems p. 131
Recomindation : new functions for augmented memories p. 141
Automating semantic annotation to enable learning content adaptation p. 151
A scalable solution for adaptive problem sequencing and its evaluation p. 161
Interactions between stereotypes p. 172
Adaptation of cross-media surveys to heterogeneous target groups p. 182
The effect of adapting feedback generality in ITS p. 192
An authoring tool for building both mobile adaptable tests and Web-based adaptive or classic tests p. 203
ASHDM - model-driven adaptation and meta-adaptation p. 213
Visualizing personal relations in online communities p. 223
A comparative study of compound critique generation in conversational recommender systems p. 234
Adapting educational hypermedia to interaction behaviors p. 244
UbiquiTo-S : a preliminary step toward semantic adaptive Web services p. 249
Considering additional adaptation concerns in the design of Web applications p. 254
Towards measuring the cost of changing adaptive hypermedia systems p. 259
Adaptive patient education framework featuring personalized cardiovascular risk management interventions p. 264
Using contexts to personalize educational topic maps p. 269
Combining coherence and adaptation in discourse-oriented hypermedia generation p. 274
A graph-based monitoring tool for adaptive hypermedia course systems p. 279
Much to know about history p. 283
Learning object context for adaptive learning design p. 288
Personalised navigation system with multidimensional linkbases p. 293
Personalized navigation in open information space represented by ontology p. 298
A unified approach to adaptive hypermedia personalisation and adaptive service composition p. 303
Can adaptive systems participate in their design? : meta-adaptivity and the evolution of adaptive behavior p. 308
A system for adaptive information retrieval p. 313
Describing adaptive navigation requirements of Web applications p. 318
Learning styles adaptation language for adaptive hypermedia p. 323
Context-based navigational support in hypermedia p. 328
Contextual media integration and recommendation for mobile medical diagnosis p. 333
User modelling : an empirical study for affect perception through keyboard and speech in a bi-modal user interface p. 338
The AHES taxonomy : extending adaptive hypermedia to software components p. 342
Web-based recommendation strategy in a Cadastre information system p. 346
Topic-centered adaptive curriculum for e-learning p. 350
Semantic-based thematic search for personalized e-learning p. 354
Adaptation in adaptable personal information environment p. 358
Towards formalising adaptive behaviour within the scope of e-learning p. 362
Informing context to support adaptive services p. 366
eDAADe : an adaptive recommendation system for comparison and analysis of architectural precedents p. 370
On the dynamic adaptation of computer assisted assessment of free-text answers p. 374
My compiler really understands me : an adaptive programming language tutor p. 389
Adaptive learning for very young learners p. 393
A collaborative constraint-based adaptive system for learning object-oriented analysis and design using UML p. 398
Decentralized mediation of user models for a better personalization p. 404
From interoperable user models to interoperable user modeling p. 409
Assessment of motivation in online learning environments p. 414
User-system-experience model for user centered design in computer games p. 419
Adaptive support for cross-language text retrieval p. 425
Some ideas for a collaborative search of the optimal learning path p. 430
Interception of user's interests on the Web p. 435
Intervention strategies to increase self-efficacy and self-regulation in adaptive on-line learning p. 440
Dynamic content discovery, harvesting and delivery, from open corpus sources, for adaptive systems p. 445
Personalised multimodal interfaces for mobile geographic information systems p. 452
A model for personalized learning through IDTV p. 457
Performance enhancement for open corpus adaptive hypermedia systems p. 462
Personalized navigation in the semantic Web p. 467
