A coordination framework based on the sociology of organized action p. 3
Formal modeling and analysis of organizations p. 18
Towards sustained team effectiveness p. 35
Verification and analysis of organisational change p. 48
S-Moise[superscript +]: a middleware for developing organised multi-agent systems p. 64

Fencing the open fields: empirical concerns on electronic institutions p. 81
Specifying and analysing agent-based social institutions using answer set programming p. 99
Modeling control mechanisms with normative multiagent systems: the case of the renewables obligation p. 114
Computational institutions for modelling norm-regulated MAS: an approach based on coordination artifacts p. 127
An event driven approach to norms in artificial institutions p. 142
Designing normative behaviour via landmarks p. 157
Design by contract deontic design language for multiagent systems p. 170
Informed deliberation during norm-governed practical reasoning p. 183
Organizations in artificial social systems p. 198
Exploring congruence between organizational structure and task performance: a simulation approach p. 213
Verifying norm compliancy of protocols p. 231
A rule language for modelling and monitoring social expectations in multi-agent systems p. 246
