Foundations and Methodology Comparisons

Fundamentals of Generic Programming p. 1
Requirement Oriented Programming p. 12
Generative Programming and Active Libraries p. 25
The Refinement Relation of Graph-Based Generic Programs p. 40
The Construction Principles of the Class Library Karla p. 53

Programming Methodology

Exception-Safety in Generic Components p. 69
Segmented Iterators and Hierarchical Algorithms p. 80
Theory and Generality of Complete Traversals p. 91
A Data Abstraction Alternative to Data Structure/Algorithm Modularization p. 102

Language Design

Two Ways to Bake Your Pizza-Translating Parameterised Types into Java p. 114
SuchThat-Generic Programming Works p. 133

Specification and Verification

Software Development in PVS Using Generic Development Steps p. 146
Model Checking Generic Container Implementations p. 162
Mizar Correctness Proofs of Generic Fraction Field Arithmetic p. 178
Language Independent Container Specification p. 192

Applications

Applications of the Generic Programming Paradigm in the Design of CGAL p. 206
Generic Programming in POOMA and PETE p. 218
The STL Model in the Geometric Domain p. 232
Generic Graph Algorithms p. 249
A Generic Programming Environment for High-Performance Mathematical Libraries p. 256

Author Index p. 269
