Constraints and Constraint Solving: An Introduction p. 1
Introduction p. 1
A First Approach to Constraint Based Calculi p. 2
A Case Study of a Constraint System: Feature Constraints p. 18
Programming with Incomplete Constraint Solvers p. 29
Committed Choice: A More Realistic Approach p. 33
Constraint Solving on Terms p. 47
Introduction p. 47
The Principle of Syntactic Methods p. 48
Unification Problems p. 49
Dis-Unification Problems p. 70
Ordering Constraints p. 74
Matching Constraints p. 76
Principles of Automata Based Constraint Solving p. 78
Presburger Arithmetic and Classical Word Automata p. 79
Typing Constraints and Tree Automata p. 84
Set Constraints and Tree Set Automata p. 88
Examples of Other Constraint Systems Using Tree Automata p. 91
Combining Constraint Solving p. 104
Introduction p. 104
Classification of Constraint Systems and Combination Approaches p. 105
The Nelson-Oppen Combination Procedure p. 112
Combination of E-Unification Algorithms p. 119
The Logical and Algebraic Perspective p. 129
Generalizations p. 140
Optimization and Complexity Issues p. 147
Open Problems p. 152
Constraints and Theorem Proving p. 159
Introduction p. 159
Equality Clauses p. 160
The Purely Equational Case: Rewriting and Completion p. 166
Superposition for General Clauses p. 174
Saturation Procedures p. 186
Paramodulation with Constrained Clauses p. 189
Paramodulation with Built-in Equational Theories p. 192
Effective Saturation of First-Order Theories p. 194
Functional and Constraint Logic Programming p. 202
Introduction p. 202
A Rewriting Logic for Declarative Programming p. 204
Higher-Order Programming p. 234
Constraint Programming p. 252
Conclusions
Building Industrial Applications with Constraint Programming
Introduction
Constraint Programming
The CHIP System
Application Studies
Industrial Applications
Case Studies
Application Framework
Analysis
Does CLP Deliver?
Limitations
Future Trends
Conclusions
