Invited Papers

Predicting Signal Peptides with Support Vector Machines p. 1
Scaling Large Learning Problems with Hard Parallel Mixtures p. 8

Computational Issues

On the Generalization of Kernel Machines p. 24
Kernel Whitening for One-Class Classification p. 40
A Fast SVM Training Algorithm p. 53
Support Vector Machines with Embedded Reject Option p. 68

Object Recognition

Image Kernels p. 83
Combining Color and Shape Information for Appearance-Based Object Recognition Usingp. 97
Ultrametric Spin Glass-Markov Random Fields

Maintenance Training of Electric Power Facilities Using Object Recognition by SVM p. 112

Kerneltron: Support Vector `MachineÆ in Silicon p. 120

Pattern Recognition

Advances in Component-Based Face Detection p. 135
Support Vector Learning for Gender Classification Using Audio and Visual Cues: A
Comparison p. 144
Analysis of Nonstationary Time Series Using Support Vector Machines p. 160
Recognition of Consonant-Vowel (CV) Units of Speech in a Broadcast News Corpus Usingp. 171
Support Vector Machines

Applications

Anomaly Detection Enhanced Classification in Computer Intrusion Detection p. 186
Sparse Correlation Kernel Analysis and Evolutionary Algorithm-Based Modeling of the
Sensory Activity within the RatÆs Barrel Cortex p. 198
Applications of Support Vector Machines for Pattern Recognition: A Survey p. 213
Typhoon Analysis and Data Mining with Kernel Methods p. 237

Poster Papers

Support Vector Features and the Role of Dimensionality in Face Authentication p. 249
Face Detection Based on Cost-Sensitive Support Vector Machines p. 260
Real-Time Pedestrian Detection Using Support Vector Machines p. 268
Forward Decoding Kernel Machines: A Hybrid HMM/SVM Approach to Sequence Recognition p. 278

Color Texture-Based Object Detection: An Application to License Plate Localization p. 293

Support Vector Machines in Relational Databases p. 310
Multi-Class SVM Classifier Based on Pairwise Coupling p. 321
Face Recognition Using Component-Based SVM Classification and Morphable Models p. 334
A New Cache Replacement Algorithm in SMO p. 342
Optimization of the SVM Kernels Using an Empirical Error Minimization Scheme p. 354
Face Detection Based on Support Vector Machines p. 370
Detecting Windows in City Scenes p. 388
Support Vector Machine Ensemble with Bagging p. 397
A Comparative Study of Polynomial Kernel SVM Applied to Appearance-Based Object Recognition
