Solar Wind

Introduction p. 96
The Corona p. 96
Outward Decline of Density and Pressure p. 97
Comets and Solar Corpuscular Radiation p. 98
Cosmic Ray Variations p. 98
Plasma in Interplanetary Space p. 99
The State of the Corona p. 100
Theoretical Foundations of Hydrodynamics and Magnetohydrodynamics p. 101
Kinetic Conditions in the Corona p. 103
Magnetohydrodynamics p. 104
Hydrodynamic Expansion of the Solar Corona p. 105
Sufficient Conditions on Coronal Temperature p. 107
Analogy with Expansion Through a Laval Nozzle p. 108
Gravitational Throttling of Coronal Expansion p. 109
Wind Density and Solar Mass Loss p. 110
Magnetic Fields and Streams in the Solar Wind p. 112
Discussion p. 113
References p. 114

Coronal Mass Ejection

Introduction p. 118
CMEs at the Sun p. 119
Properties p. 120
What Causes CMEs: Observational Evidence p. 121
Theoretical Ideas p. 125
Interplanetary Coronal Mass Ejections p. 128
Properties at 1 AU p. 128
Putting the Solar and Interplanetary Parts Together p. 130
Conclusions and Future Prospects p. 130
References p. 131

Solar Radio Emissions

Introduction p. 134
Radio Wave Propagation p. 135
Basics p. 135
Scattering of Radio Waves p. 137
Thermal Radiation from the Sun p. 137
Microwave Domain p. 137
Decimeter-Meter Domain p. 137
Solar Radio Bursts p. 138
Emission Mechanisms p. 139
Electron Beams p. 139
The Solar-Comet Interactions

Introduction ...................................................... p. 494
Cometary Reservoirs ........................................ p. 494
The Nature of the Cometary Nucleus .................. p. 496
Interaction with Solar Radiation ....................... p. 498
The Interaction with the Solar Wind .................. p. 501
Comets as Probes of the Solar Wind ................. p. 507
References ....................................................... p. 514
About the Authors ............................................. p. 517
Index ............................................................ p. 529
