Towards the Theory-Guided Design of Help Systems for Programming and Modelling Tasks
A New Architecture for Intelligent Help Systems p. 302
The UNIX Tutor p. 317
Tuteurs intelligents et intelligence artificielle: problemes poses en construction de figures geometriques p. 325
Generation d'exercices en algebre, premiere approches dans le cadre du projet APLUSIX p. 335
ADAPT: Automated Debugging in an Adaptive Prolog Tutor p. 343
Reference Network: A Genetic Model for Intelligent Tutoring Systems p. 351
Form, Frequency, Markedness and Strategies in Second Language Performance Modelling p. 360

Why Should an ITS Bother with Students' Explanations? p. 372
Student Strategies for Learning Programming from a Computational Environment p. 382
An Intelligent Language Tutoring System for Handling Errors Caused by Transfer p. 395
The Application of Cognitive Diagnosis to the Quantitative Analysis of Simple Electrical Circuits p. 405
Student Modeling and Mastery Learning in a Computer-Based Programming Tutor p. 413
Application de la methodologie du tracage de modele a un environnement d'apprentissage utilisant une strategie pedagogique non directive p. 421
Prediction du niveau d'acquisition des connaissances dans la modelisation de l'etudiant p. 435
Instructional Planning Using Focus of Attention p. 443
To Contradict is Human - Student Modeling of Inconsistency p. 451
Mise en oeuvre d'un modele de l'apprenant generique dans le systeme EDDI p. 459
Student Model Diagnosis for Adaptive Instruction in ITS p. 467
A Systemic Approach for Student Modeling in a Multi-Agent Aided Learning Environment p. 475

Diagnostic cognitif de l'apprenant par apprentissage symbolique p. 483
Probabilistic Student Models: Bayesian Belief Networks and Knowledge Space Theory p. 491

A Framework for Intelligent Knowledge Sequencing and Task Sequencing p. 499
The Use of Pedagogic Misrepresentation in Tutorial Dialogue p. 507
Planification pedagogique: de l'expertise humaine a sa modelisation dans un STI p. 515
COCA: A Shell for Intelligent Tutoring Systems p. 523
Enhancing the Instructional Capabilities of Intelligent Tutoring Systems p. 531
Measuring Learning Strategies and Understanding: A Research Framework p. 539
From Testing to Training: Evaluating Automated Diagnosis in Statistics and Algebra p. 559

Detecting and Reacting to the Learner's Motivational State p. 567
Automated Generation of Examples for a Tutorial in Case-Based Argumentation p. 575
The Advantages of Data Flow Diagrams for Beginning Programming p. 585
Tools for Teacher Participation in ITS Design p. 593
Intelligent Tutoring with Dumb Software p. 615
