AI Approaches towards Sensor-Based Driver Support in Road Vehicles p. 1
Representing Concurrent Actions and Solving Conflicts p. 16
Preselection Strategies for Case Based Classification p. 28
Utilizing Spatial Relations for Natural Language Access to an Autonomous Mobile Robot p. 39
Cardinality Restrictions on Concepts p. 51
An Artificial Neural Network for High Precision Eye Movement Tracking p. 63
A Kripke-Kleene Logic over General Logic Programs p. 70
The Stable Semantics and its Variants: A Comparison of Recent Approaches p. 82
TabVer: A Case Study in Table Verbalization p. 94
Cooperating to be Noncooperative: The Dialog System PRACMA p. 106
Robust Constructive Induction p. 118
Enriching a Semantic Network Language by Integrating Qualitative Reasoning Techniques p. 130
Combining Spatial and Terminological Reasoning p. 142
Detecting Gestalts in CAD-Plans to be used as Indices for Case-retrieval in Architecture p. 154
The NeuDB-System: Towards the Integration of Neural Networks and Database Systems p. 166
Weighted Defaults in Description Logics: Formal Properties and Proof Theory p. 178
Epistemic Queries in Classic p. 190
Communicating Rational Agents p. 202
Knowledge-Level Modularization of a Complex Knowledge Base p. 214
Program Verification Techniques as a Tool for Reasoning about Action and Change p. 226
A Conditional Logic for Updating in the Possible Models Approach p. 237
Probabilistic Justification of Default Reasoning p. 248
A Prioritized Contextual Default Logic: Curing Anomalous Extensions with a Simple Abnormality Default Theory p. 260
Incorporating Specificity into Circumscriptive Theories p. 272
Coherent Choice and Epistemic Entrenchment p. 284
A Note on Tableaux of Logic of Paradox p. 296
When Nonmonotonicity Comes from Distances p. 308
Rigid Unification by Completion and Rigid Paramodulation p. 319
Unification in a Sorted [lambda]-Calculus with Term Declarations and Function Sorts p. 331
Goal Oriented Equational Theorem Proving Using Team Work p. 343
The Hardest Random SAT Problems p. 355
Formal Methods for Automated Program Improvement p. 367
Adapting Methods to Novel Tasks in Proof Planning p. 379
Using Charts for Transfer in MT p. 391
A New Frame for Common-Sense Reasoning - Towards Local Inconsistencies p. 392
Prioritized Transitions for Updates p. 393
An Optimal Bidirectional Search Algorithm p. 394
