On Confluence of Constraint Handling Rules
A Labelling Arc Consistency Method for Functional Constraints
Constraint Satisfaction in Optical Routing for Passive Wavelength-Routed Networks
Using CSP Look-Back Techniques to Solve Exceptionally Hard SAT Instances
MAC and Combined Heuristics: Two Reasons to Forsake FC (and CBJ?) on Hard Problems

The Independence Property of a Class of Set Constraints
Speeding Up Constraint Propagation by Redundant Modeling
A Constraint-Based Interactive Train Rescheduling Tool
Local Search and the Number of Solutions
Derivation of Constraints and Database Relations
Constraint Programming: An Efficient and Practical Approach to Solving the Job-Shop Problem

An Instance of Adaptive Constraint Propagation
An Empirical Study of Dynamic Variable Ordering Heuristics for the Constraint Satisfaction Problem
Empirical Studies of Heuristic Local Search for Constraint Solving
Defeasibility in CLP(Q) through Generalized Slack Variables
Inference Duality as a Basis for Sensitivity Analysis
Generalized Local Propagation: A Framework for Solving Constraint Hierarchies
Transformations Between HCLP and PCSP
A Test for Tractability
Combination of Constraint Systems II: Rational Amalgamation
Tractable Disjunctions of Linear Constraints
Exploiting the Use of DAC in MAX-CSP
A New Approach for Weighted Constraint Satisfaction: Theoretical and Computational Results
Towards a More Efficient Stochastic Constraint Solver
A View of Local Search in Constraint Programming
From Quasi-Solutions to Solution: An Evolutionary Algorithm to Solve CSP
Existential Variables and Local Consistency in Finite Domain Constraint Problems
Logical Semantics of Concurrent Constraint Programming
Solving Non-Binary Convex CSPs in Continuous Domains
An Experimental Comparison of Three Modified DeltaBlue Algorithms
Constraint Logic Programming over Unions of Constraint Theories
Analysis of Hybrid Systems in CLP(R)
On Query Languages for Linear Queries Definable with Polynomial Constraints
Analysis of Heuristic Methods for Partial Constraint Satisfaction Problems
Solving Satisfiability Problems Using Field Programmable Gate Arrays: First Results

A Constraint Program for Solving the Job-Shop Problem
PSAP - A Planning System for Aircraft Production
Using Partial Arc Consistency in a Database Environment  p. 527
Functional Constraint Hierarchies in CLP  p. 529
Towards an Open Finite Domain Constraint Solver  p. 531
Efficient Constraint Propagation with Good Space Complexity  p. 533
From Constraint Minimization to Goal Optimization in CLP Languages  p. 537
Looking at Full Looking Ahead  p. 539
The Arc and Path Consistency Phase Transitions  p. 541
Experiences with Combining Constraint Programming and Discrete Event Simulation  p. 543
Hill-Climbing with Local Consistency for Solving Distributed CSPs  p. 545
Approximate Algorithms for Maximum Utility Problems  p. 547
A Meta Constraint Logic Programming Architecture  p. 549
N-Ary Consistencies and Constraint-Based Backtracking  p. 551
Global Behaviour for Complex Constraints  p. 553
To Guess or to Think? Hybrid Algorithms for SAT  p. 555
A Local Simplification Scheme for cc Programs  p. 557
From Evaluating Upper Bounds of the Complexity of Solving CSPs to Finding All the Solutions of CSPs  p. 559
Modeling and Solving Distributed Constraint Satisfaction Problems (DCSPs)  p. 561
Scheduling an Asynchronously Shared Resource  p. 563
The Generalized Railroad Crossing: Its Symbolic Analysis in CLP(R)  p. 565
A Stochastic Approach to Solving Fuzzy Constraint Satisfaction Problems  p. 568
Branch-and-Price for Solving Integer Programs with a Huge Number of Variables: Methods and Applications  p. 570
Constraint Databases  p. 571
Complexity-Theoretic Aspects of Programming Language Design  p. 572
Author Index  p. 573
