The Success Story of the Transfer and Development of Methods from Geophysics to Helioseismology

Filtering in Inversion for Solar Internal Structure

Averaging Kernels, Error Correlation Functions and Linear Methods in Helioseismology

Inversion for the Velocity Field in the Solar Interior

On the Choice of Trade-off Parameter in Helioseismic SOLA Inversion

Prospects for Binary Star Research Using Disentangling

Estimating Bidirectional Transport Parameters for the Blood-Retina Barrier - A Feasibility Study

Determination and variability of depth profiles from XPS backgrounds

Uncertainties in Seismic Inverse Calculations

Constrained Waveform Inversion of Seismic Well Data

Geological Information and the Inversion of Seismic Data

A Study of Model Covariances in Amplitude Seismic Inversion

Resolution and Error Propagation Analysis for Tomographic Data with Correlated Errors

Estimating Background Velocity from Reflection Seismic Data - A Feasibility Study

Phase Migration: An Approach to Inversion of Wide-Angle Seismic Data

Location of Seismic Events - A Quest for Accuracy

Inverse Estimation of Parameters in Petroleum Reaction Networks

Inversion of a Simple Petroleum Expulsion Model

Inversion of Transient Hydraulic Head Variation Caused by a controlled Point Source

Deconvolution of Geophysical Multioffset Resistivity Profile Data

Imaging of Transient Electromagnetic Soundings Using a Scaling Approximate Fréchet Derivative

A Case of Processing Design Using Inversion: Simple Gating versus Iterative Reweighted Least Squares Inversion

Inverting Magnetotelluric Data Using Genetic Algorithms and Simulated Annealing

Ionospheric Tomography

Application of Inversion to Global Ocean Tide Mapping

Inversion of STEP-Observation Equation Using Barnach's Fixed-Point Principle

Improving the Planar Isotropic Covariance Models

Least Squares Adjustment of High Degree Spherical Harmonics

Piecewise Polynomial Solutions to Linear Inverse Problems

Regularization Methods for Almost Rank-Deficient Nonlinear Problems

Constant Thermodynamic Speed Simulated Annealing

Mean Field Reconstruction with Snaky Edge Hints

An Object-Oriented Toolbox for Studying Optimization Problems

Maximum Mixing Method
