Keynote Address: Correctness of Programs and Protocols through Randomization p. 1
Medical Image Analysis and Simulation p. 4
Verification of Pipelined Microprocessors by Comparing Memory Execution Sequences in Symbolic Simulation p. 18
Rules for Abstraction p. 32
Combining Z and Temporal Interval Logics for the Formalization of Properties and Behaviors of Embedded Systems p. 46
Rules for Trace Consistent Reasoning p. 57
Sensitivity Analysis of Real-Time Task Sets p. 72
Dynamic Multiprocessor Scheduling for Supporting Real-Time Constraints p. 83
Heuristic Diff Acquiring in Lazy Release Consistency Model p. 98
Representation of Discretely Controlled Continuous Systems in Software-Oriented Formal Analysis p. 110
A Generalized Framework for Reasoning with Multi-point Events p. 121
Implementing Constraint Retraction for Finite Domains p. 136
INSTANCE: The Intermediate Storage Node Concept p. 151
Checking Hybrid Automata for Linear Duration Invariants p. 166
Hierarchical Automata as Model for Statecharts p. 181
Proof Discovery in LK System by Analogy p. 197
Efficient Induction of Executable Logic Programs from Examples p. 212
Automated Verification of Behavioural Properties of Prolog Programs p. 225
Typing the Use of Resources in a Concurrent Calculus p. 239
An Imperative Language with Read/Write Type Modes p. 254
Efficient Goal Scheduling in a Concurrent Logic Language Using Type-Based Dependency Analysis p. 268
An Analysis of Divisibility Orderings and Recursive Path Orderings p. 283
Share-Where Maintenance in Visual Algebraic Specifications p. 297
A Fault Tolerant Broadcast Scheme in Star Graphs p. 312
Calculus of Classical Proofs I p. 321
Tracing the Evaluation of Lazy Functional Languages: A Model and Its Implementation p. 336
Basic Results in Automatic Transformations of Shared Memory Parallel Programs into Sequential Programs p. 351
Recurrent Oscillatory Self-organizing Map: Adapting to Complex Environmental Periodicities p. 367
Basic Binary Decision Diagram Operations for Image Processing p. 368
Adaptive Object Storage System for Mobile Computing Environments p. 371
Structure of User Interface Module for Practical Internet Messages p. 373
Software Specification Using LASS p. 375
Nepi [superscript 2]: A Two-Level Calculus for Network Programming Based on the [pi]-Calculus p. 377
On Semantics of Reactive Rule-Based Systems p. 379
The Non-standard Semantics of Esterel p. 381
Hybrid Support for Lenient Implementation of Array-Comprehension p. 383
