Introduction p. 1
Materials and Methods p. 5
Tissue Preparation p. 5
Immunocytochemistry p. 6
In Situ Hybridization p. 10
Results and Discussions p. 15
Cytoarchitectonics p. 15
Comparative Light, Fluorescence, and Electron-Microscopic Studies of the Morphology and Neurochemistry of Catecholaminergic Afferent Fibers to the Amygdala p. 15
Ultrastructural Features of Neurons and Catecholaminergic Afferent Fibers in the Nucleus Centralis, the Basal Complex, and the Paracapsular Intercalated Cell Groups p. 28
Colocalization of Neuropeptides in Catecholaminergic Afferent Fibers to the Amygdala p. 57
Neurochemical Characterization of Possible Target Neurons of the Catecholaminergic Amygdala Innervation p. 63
Summary p. 103
Conclusions for the Individual Amygdaloid Nuclei p. 103
Conclusions for the Different Types of Catecholaminergic Innervation p. 105
References p. 109
Subject Index p. 119
