On B

The Generalised Substitution Language Extended to Probabilistic Programs

METEOR: An Industrial Success in Formal Development

Cost Effectiveness of Formal Methods in the Development of Avionics Systems at AEROSPATIALE

Well Defined B

Composition and Refinement in the B-Method

Formalisation of B in Isabelle/HOL

Introducing Dynamic Constraints in B

Retrenchment: An Engineering Variation on Refinement

Synthesising Structure from Flat Specifications

An Object-Based Approach to the B Formal Method

Graphical Design of Reactive Systems

Process Control Engineering: Contribution to a Formal Structuring Framework with the B Method

Designing a B Model for Safety-Critical Software Systems

Abstract State Machines: Designing Distributed Systems with State Machines and B

Layering Distributed Algorithms within the B-Method

Two Strategies to Data-Refine an Equivalence to a Forest

Specification of an Integrated Circuit Card Protocol Application Using the B Method and Linear Temporal Logic

Test Case Preparation Using a Prototype
