Invited Lectures
Challenges in the Utilization of Formal Methods  p. 1
On the Need for "Practical" Formal Methods  p. 18
A General Framework for the Composition of Timed Systems  p. 27
Selected Presentations
Temporal Logic
Operational and Logical Semantics for Polling Real-Time Systems  p. 29
A Finite-Domain Semantics for Testing Temporal Logic Specifications  p. 41
Duration Calculus of Weakly Monotonic Time  p. 55
Requirements Engineering
Reuse in Requirements Engineering: Discovery and Application of a Real-Time Requirement Pattern  p. 65
A Modular Visual Model for Hybrid Systems  p. 75
Integrating Real-Time Structured Design and Formal Techniques  p. 92
Duration Calculus in the Specification of Safety Requirements  p. 103
Analysis Techniques
Automated Stream-Based Analysis of Fault-Tolerance  p. 113
Designing a Provably Correct Robot Control System Using a 'Lean' Formal Method  p. 123
Static Analysis to Identify Invariants in RSML Specifications  p. 133
Partition Refinement in Real-Time Model Checking  p. 143
Verification
Formal Verification of Stabilizing Systems  p. 158
VIII Synchronizing Clocked Transition Systems  p. 173
Some Decidability Results for Duration Calculus under Synchronous Interpretation  p. 186
Fair Synchronous Transition Systems and Their Liveness Proofs  p. 198
Model Checking
Dynamical Properties of Timed Automata  p. 210
An Algorithm for the Approximative Analysis of Rectangular Automata  p. 228
On Checking Parallel Real-Time Systems for Linear Duration Properties  p. 241
A Practical and Complete Algorithm for Testing Real-Time Systems  p. 251
Applications
Mechanical Verification of Clock Synchronization Algorithms  p. 262
Compiling Graphical Real-Time Specifications into Silicon  p. 272
Towards a Formal Semantics of Verilog Using Duration Calculus  p. 282
Tools Demonstrations
The ICOS Synthesis Environment  p. 294
SGLOT: A Visual Tool for Structural LOTOS Specifications  p. 303
Discrete-Time Promela and Spin  p. 307
Moby/plc - Graphical Development of PLC-Automata  p. 311
Invited Paper
Predictability in Critical Systems  p. 315
