In these Proceedings, the invited talks are grouped into a separate corpus. Papers are loosely grouped by theme, as were the presentation sessions. Because of these weak groupings, to give names to the sessions would have been misleading.

Separating Sets by Modal Formulas Bernhard Heinemann Interpolation in Modal Logic Maarten Marx Building Models of Linear Logic Valeria de Paiva and Andrea Schalk Term Rewriting in a Logic of Special Relations W. Marco Schorlemmer Abstraction Barriers in Equational Proof Jo Erskine Hannay

A Synergy Between Model-Checking and Type Inference for the Verification of Value-Passing Higher-Order Processes Mourad Debbabi, Abdelkader Benzakour, and Bechir Ktari A Trace-Based Refinement Calculus for Shared-Variable Parallel Programs Juergen Dingel Consistency of Partial Process Specifications Maarteen Steen, John Derrick, Eerke Boiten, and Howard Bowman Obervational Logic Rolf Hennicker and Michel Bidoit Scheduling Algebra Rob van Glabbeek and Peter Rittgen

Algebraic Semantics of Coordination or What Is in a Signature? Jose Luiz Fiadeiro and Antnia Lopes An Algebraic Approach to Combining Processes in a Hardware/Software Partitioning Environment Leila Silva, Augusto Sampaio, Edna Barros, and Juliano Iyoda An Algebraic View of Program Composition Pietro Cenciarelli Architectural Specifications in CASL Michel Bidoit, Donald Sannella, and Andrezej Tarlecki Pi-Congruences as CCS Equivalences Paola Quaglia

Algebraic Specifications, Higher-Order Types, and Set-Theoretic Models Helene Kirchner and Peter D. Mosses Type Analysis for CHIP Wlodzimierz Drabent and Pawel Pietrzak Categorical Programming with Abstract Data Types Martin Erwig Condensing Lemmas for Pure Type Systems with Universes Blas C. Ruiz Jimenez Improving Computations in a Typed Functional Logic Language Jess Manuel Almendros-Jimenez
