Invited Talks
Challenges for the Web: Universality and Scability p. 1
The UC Berkeley Digital Library Project: Re-thinking Scholarly Information Dissemination and Use p. 2

Papers

Image Categorisation and Access
Image and Metadata Distribution at Seven University Campuses: Re-ports from a Study p. 3 of the Museum Educational Site Licensing Project
Text-Based Approaches for the Categorization of Images p. 19
Metadata for Photographs: From Digital Library to Multimedia Application p. 39
Audio and Video in Digital Libraries
Audiovisual Cultural Heritage: From TV and Radio Archiving to Hyper-media Publishing p. 58

Information Retrieval
An Indexing, Browsing, Search and Retrieval System for Audiovisual Libraries p. 76
Music Structure Analysis and Its Application to Theme Phrase Extraction p. 92

User Adaptation
Design Guidelines and User-Centred Digital Libraries p. 167
User Profile Modeling and Applications to Digital Libraries p. 184
Using and Evaluating User Directed Summaries to Improve Information Access p. 198

Knowledge Sharing
Pharos, a Collaborative Infrastructure for Web Knowledge Sharing p. 215
Integrating Ontologies and Thesauri to Build RDF Schemas p. 234
Dynamic Use of Digital Library Material - Supporting Users with Typed Links in Open Hypermedia p. 254

Cross Language
Disambiguation Strategies for Cross-Language Information Retrieval p. 274
Crosslingual Interrogation of Multilingual Catalogs p. 294
Term Similarity-Based Query Expansion for Cross-Language information retrieval p. 311

Case Studies
The SOMLib Digital Library System p. 323
Developing a European Technical Reference Digital Library p. 343
Issues in the Development and Operation of a Digital Library p. 363
Modelling, Accessibility and Connectness
Declarative Specification of Z39.50 Wrappers Using Description Logics p. 383
PIA - a Generic Model and System for Interactive Product and Service Catalogs p. 403
Representing Scholarly Claims in Internet Digital Libraries: A Knowledge Modelling Approach p. 423
The Small World Web p. 443
