Foundations of System Specification (IFIPWG 1.3)
From Informal Requirements to COOP: A Concurrent Automata Approach p. 939
A Framework for Defining Object-Calculi p. 963
European Theory and Practice of Software (ETAPS)
A Translation of Statecharts to Esterel p. 983
An Operational Semantics for Timed RAISE p. 1008
Data Abstraction for CSP-OZ p. 1028
Systems Development Using Z Generics p. 1048
A Brief Summary of VSPC p. 1068
Enhancing the Pre- and Postcondition Technique for More Expressive Specifications p. 1087
Program Verification
On Excusable and Inexcusable Failures p. 1107
Interfacing Program Construction and Verification p. 1128
Software Verification Based on Linear Programming p. 1147
Integration of Notation and Techniques
Sensors and Actuators in TCOZ p. 1166
The UniForM Workbench, a Universal Development Environment for Formal Methods p. 1186
Integrating Formal Description Techniques p. 1206
Formal Description of Programming Concepts (IFIPWG 2.2)
A More Complete TLA p. 1226
Formal Justification of the Rely-Guarantee Paradigm for Shared-Variable Concurrency: A Semantic Approach p. 1245
Relating Z and First-Order Logic p. 1266
Open Information Systems
Formal Modeling of the Enterprise JavaBeans p. 1281
Developing Components in the Presence of Re-entrance p. 1301
Communication and Synchronisation Using Interaction Objects p. 1321
Modelling Microsoft COM Using \( \lambda \)-Calculus p. 1343
Co-design
Validation of Mixed Signal-Alpha Real-Time Systems through Affine Calculus on Clock Synchronisation Constraints p. 1364
Combining Theorem Proving and Continuous Models in Synchronous Design p. 1384
ParTS: A Partitioning Transformation System p. 1400
A Behavioral Model for Co-design p. 1420
Refinement
A Weakest Precondition Semantics for an Object-Oriented Language of Refinement p. 1439
Reasoning About Interactive Systems p. 1460
Non-atomic Refinement in Z p. 1477
Refinement Semantics and Loop Rules p. 1497
Safety
Lessons from the Application of Formal Methods to the Design of a Storm Surge Barrier Control System p. 1511

Invited Papers
Theories of Programming: Top-Down and Bottom-Up Meeting in the Middle p. 1
Scientific Decisions which Characterise VDM p. 28
Integration, the Price of Success p. 52
The Role of Formalism in Method p. 56
Integration into the Development Process p. 57
Formal Design for Automatic Coding and Testing: The ESSI/SPACES Project
A Business Process Design Language p. 76
Software Architecture
Refinement of Pipe-and-Filter Architectures p. 96
A Formalization of Software Architecture p. 116
European Association for Theoretical Computer Science (EATCS)
Component and Interface Refinement in Closed-System Specifications p. 134
Semantics of First Order Parametric Specifications p. 155
Model Checking
A Perfecto Verification: Combining Model Checking with Deductive Analysis to Verify Real-Life Software p. 173
Error Detection with Directed Symbolic Model Checking p. 195
Formal Modeling and Analysis of Hybrid Systems: A Case Study in Multi-robot Coordination p. 212
On-the-Fly Controller Synthesis for Discrete and Dense-Time Systems p. 233
On-the-Fly Verification of Linear Temporal Logic p. 253
Symbolic Model Checking with Fewer Fixpoint Computations p. 272
Formula Based Abstractions of Transition Systems for Real-Time Model Checking p. 289
IF: An Intermediate Representation and Validation Environment for Timed Asynchronous Systems p. 307
Automatic Verification of Pointer Data-Structure Systems for All Numbers of Processes p. 328
The B Method
The Use of the B Formal Method for the Design and the Validation of the Transaction Mechanism for Smart Card Applications p. 348
Météor: A Successful Application of B in a Large Project p. 369
Formal Development of Databases in ASSO and B p. 388
Interpreting the B-Method in the Refinement Calculus p. 411
Compositional Symmetric Sharing in B p. 431
Structural Embeddings: Mechanization with Method p. 452
The Safe Machine: A New Specification Construct for B p. 472
csp2B: A Practical Approach to Combining CSP and B p. 490
Composition and Synthesis
Bunches for Object-Oriented, Concurrent, and Real-Time Specification p. 530
Applications of Structural Synthesis of Programs p. 551
Towards a Compositional Approach to the Design and Verification of Distributed Systems  p. 570
Telecommunications
Formal Modeling in a Commercial Setting: A Case Study  p. 590
KVEST: Automated Generation of Test Suites from Formal Specifications  p. 608
Emma: Developing an Industrial Reachability Analyser for SDL  p. 642
Correction Proof of the Standardized Algorithm for ABR Conformance  p. 662
Verifying a Distributed Database Lookup Manager Written in Erlang  p. 682
Security
Secure Interoperation of Secure Distributed Databases  p. 701
A Formal Security Model for Microprocessor Hardware  p. 718
Abstraction and Testing
Formal Analysis of a Secure Communication Channel: Secure Core-Email Protocol  p. 758
Probabilistic Polynomial-Time Equivalence and Security Analysis  p. 776
A Uniform Approach for the Definition of Security Properties  p. 794
Group Principals and the Formalization of Anonymity  p. 814
Object-Orientation
Developing BON as an Industrial-Strength Formal Method  p. 834
On the Expressive Power of OCL  p. 854
A Systematic Approach to Transform OMT Diagrams to a B Specification  p. 875
Testing
Verifying Consistency and Validity of Formal Specifications by Testing  p. 896
A GSM-MAP Protocol Experiment Using Passive Testing  p. 915
Author Index  p. 935
