Invited Papers
The Rough Guide to Constraint Propagation p. 1
Non-binary Constraints p. 24
The Theory of Discrete Lagrange Multipliers for Nonlinear Discrete Optimization p. 28
Regular Papers
Operational Equivalence of CHR Programs and Constraints p. 43
Automatic Generation of Constraint Propagation Algorithms for Small Finite Domains p. 58
Excluding Symmetries in Constraint Based Search p. 73
On Forward Checking for Non-binary Constraint Satisfaction p. 88
Exploiting Arc Consistency on Global Constraints by solving subCSPs on the Fly p. 103
Towards a Complete Classification of Tractability in Point Algebras for Nonlinear Time p. 129
Closure Functions and Width 1 Problems p. 159
An Overview of HAL p. 174
Cost-Based Domain Filtering p. 189
Resource Allocation in Networks Using Abstraction and Constraint Satisfaction Techniques p. 204
Optimal Distributed Arc-Consistency p. 219
The Goldilocks Problem p. 234
Multistep Filtering Operators for Ordinary Differential Equations p. 246
A Framework for Constraint Programming Based Column Generation p. 261
Improving a Heuristic Repair Method for Large-Scale School Timetabling Problems p. 275
Applying Constraint Programming to Protein Structure Determination p. 289
Partition-Based Lower Bound for Max-CSP p. 303
Constraint Diagram Reasoning p. 316
Automatic Generation of Music Programs p. 331
Search Procedures and Parallelism in Constraint Programming p. 346
Ensuring a Relevant Visiting Order of the Leaf Nodes during a Tree Search p. 361
Tight Cooperation and its Application in Piecewise Linear Optimization p. 375
Optimal Distributed Arc-Consistency for Global Cardinality Constraints with Costs p. 390
The Brélaz Heuristic and Optimal Static Orderings p. 405
A Fixpoint Definition of Dynamic Constraint Satisfaction p. 419
Solving Satisfiability Problems on FPGAs Using Experimental Unit Propagation p. 434
On the Behavior and Application of Constraint Weighting p. 446
Simulated Annealing with Asymptotic Convergence for Nonlinear Constrained Global Optimization p. 461
Poster Papers
On SAT01 Problem p. 476
An Interval Constraint Approach to Handle Parametric Ordinary Differential Equations for Decision Support p. 478
