Invited Talk 1 (Abstract)
Architecting Web-Based Systems with the Unified Modeling Language p. 1
Software Architecture
Extending Architectural Representation in UML with View Integration p. 2
Enabling the Refinement of a Software Architecture into a Design p. 17
Using the UML for Architectural Description p. 32
UML and Other Notations
Viewing the OML as a Variant of the UML p. 49
A Comparison of the Business Object Notation and the Unified Modeling Language p. 67
Formalizing the UML Class Diagram Using Object-Z p. 83
Formalizing Interactions
A Formal Approach to Collaborations in the Unified Modeling Language p. 99
A Formal Semantics for UML Interactions p. 116
Panel 1
UML 2.0 Architectural Crossroads: Sculpting or Mudpacking? p. 131
Meta-Modeling
Core Meta-Modelling Semantics of UML: The pUML Approach p. 140
A Metamodel for OCL p. 156
Tools
Tool-Supported Compressing of UML Class Diagrams p. 172
A Pragmatic Approach for Building a User-Friendly and Flexible UML Model Repository p. 188
Components
Modeling Dynamic Software Components in UML p. 204
Extending UML for Modeling Reflective Software Components p. 220
UML Extension Mechanisms
Nine Suggestions for Improving UML Extensibility p. 236
A Classification of Stereotypes for Object-Oriented Modeling Languages p. 249
First-Class Extensibility for UML - Packaging of Profiles, Stereotypes, Patterns p. 265
Process Modeling
UML-Based Fusion Analysis p. 278
Using UML for Modelling the Static Part of a Software Process p. 292
Framework for Describing UML Compatible Development Processes p. 308
Invited Talk 2
On the Behavior of Complex Object-Oriented Systems p. 324
Real-Time Systems
UML-RT as a Candidate for Modeling Embedded Real-Time Systems in the Telecommunication Domain p. 330
Modeling Hard Real Time Systems with UML - The OOHARTS Approach p. 339
UML Based Performance Modeling Framework for Object-Oriented Distributed Systems p. 356
Constraint Languages
Defining the Context of OCL Expressions p. 372
Mixing Visual and Textual Constraint Languages p. 384
Correct Realizations of Interface Constraints with OCL p. 399
Analyzing UML Models 1
Generating Tests from UML Specifications p. 416
Formalising UML State Machines for Model Checking p. 430
Panel 2
SDL as UML: Why and What p. 446
Coding 1
UML Behavior: Inheritance and Implementation in Current Object-Oriented Languages p. 457
UML Collaboration Diagrams and Their Transformation to Java p. 473
Analyzing UML Models 2
Towards Three-Dimensional Representation and Animation of UML Diagrams p. 489
Typechecking UML Static Models p. 503
Precise Behavioral Modeling
Analysing UML Use Cases as Contracts p. 518
Closing the Gap Between Object-Oriented Modeling of Structure and Behavior p. 534
Static Modeling
Black and White Diamonds p. 550
Interconnecting Objects via Contracts p. 566
How Can a Subsystem Be Both a Package and a Classifier? p. 584
Applying the UML
Using UML/OCL Constraints for Relational Database Design p. 598
Towards a UML Extension for Hypermedia Design p. 614
Why Unified is Not Universal? - UML Shortcomings for Coping with Round-Trip Engineering p. 630
Sequence Diagrams
Timed Sequence Diagrams and Tool-Based Analysis - A Case Study p. 645
Timing Analysis of UML Sequence Diagrams p. 661
Coding 2
The Normal Object Form: Bridging the Gap from Models to Code p. 675
Modeling Exceptional Behavior p. 691
Panel 3
Advanced Methods and Tools for a Precise UML p. 706
Author Index p. 723
