Invited Talks
Aspects and Formal Methods  p. 1
Getting Formal Verification into Design Flow  p. 12
Lessons in the Weird and Unexpected: Some Experiences from Checking Large Real Systems  p. 38
Simulation, Orchestration and Logical Clocks  p. 34
Programming Language Analysis
CoVaC: Compiler Validation by Program Analysis of the Cross-Product  p. 35
Lazy Behavioral Subtyping  p. 52
Checking Well-Formedness of Pure-Method Specifications  p. 68
Verification
Verifying Dynamic Pointer-Manipulating Threads  p. 84
Proofs and Refutations for Probabilistic Refinement  p. 100
Assume-Guarantee Verification for Interface Automata  p. 116
Real-Time and Concurrency
Automated Verification of Dense-Time MTL Specifications Via Discrete-Time Approximation  p. 132
A Model Checking Language for Concurrent Value-Passing Systems  p. 148
Grand Challenge Problems
Verification of Mondex Electronic Purses with KIV: From a Security Protocol to Verified Code  p. 165
Incremental Development of a Distributed Real-Time Model of a Cardiac Pacing System Using VDM  p. 181
FM Practice
Industrial Use of Formal Methods for a High-Level Security Evaluation  p. 198
Secret Ninja Formal Methods  p. 214
Specification and Checking of Software Contracts for Conditional Information Flow  p. 229
Runtime Monitoring and Analysis
JML Runtime Assertion Checking: Improved Error Reporting and Efficiency Using Strong Validity  p. 246
Provably Correct Runtime Monitoring (Extended Abstract)  p. 262
Communication
A Schedulerless Semantics of TLM Models Written in SystemC Via Translation into LOTOS  p. 278
A Rigorous Approach to Networking: TCP, from Implementation to Protocol to Service  p. 294
Constraint Analysis
Constraint Prioritization for Efficient Analysis of Declarative Models  p. 310
Finding Minimal Unsatisfiable Cores of Declarative Specifications  p. 326
Precise Interval Analysis vs. Parity Games  p. 342
Design
Introducing Objects through Refinement  p. 358
Masking Faults While Providing Bounded-Time Phased Recovery  p. 374
Towards Consistent Specifications of Product Families

Industry Day

An Industrial Case: Pitfalls and Benefits of Applying Formal Methods to the Development of a Network-Centric RTOS

Software Engineering with Formal Methods: Experiences with the Development of a Storm Surge Barrier Control System

Application of a Formal Specification Language in the Development of the "Mobile FeliCa" IC Chip Firmware for Embedding in Mobile Phone

Safe and Reliable Metro Platform Screen Doors Control/Command Systems
