Privacy in the electronic society | p. 1
A data sharing agreement framework | p. 22
Password exhaustion: predicting the end of password usefulness | p. 37
Network monitoring for security and forensics | p. 56
Fairness strategy for multilevel secure concurrency control protocol | p. 71
Optimistic anonymous participation in inter-organizational workflow instances | p. 86
O2O: virtual private organizations to manage security policy interoperability | p. 101
Privacy preserving Web-based email | p. 116
Context-aware provisional access control | p. 132
LRBAC: a location-aware role-based access control model | p. 147
Extending context descriptions in semantics-aware access control | p. 162
Specification and realization of access control in SPKI/SDSI | p. 177
Design of key establishment protocol using one-way functions to avert insider-replay attack | p. 194
An efficient key assignment scheme for access control in a hierarchy | p. 205
Adaptation of IEEE 802.1X for secure session establishment between ethernet peers | p. 220
Secure data management in reactive sensor networks | p. 235
Security ontology: simulating threats to corporate assets | p. 249
Two-stage credit card fraud detection using sequence alignment | p. 260
New malicious code detection using variable length n-grams | p. 276
A dead-lock free self-healing algorithm for distributed transactional processes | p. 289
An efficient public key cryptosystem secure against chosen ciphertext attack | p. 303
A partial image encryption method with pseudo random sequences | p. 315
High capacity lossless data hiding | p. 326
An implementation and evaluation of online disk encryption for Windows systems | p. 337
Disclosure risk in dynamic two-dimensional contingency tables (extended abstract) | p. 349
A survey of control-flow obfuscations | p. 353
Filtering out unfair recommendations for trust model in ubiquitous environments | p. 357
Secure itineraries framework for mobile agent systems | p. 361
Malafide intension based detection of privacy violation in information system | p. 365
Design and development of malafide intension based privacy violation detection system (an ongoing research report) | p. 369
Towards a formal specification method for enterprise information system security | p. 373
Recent research on privacy preserving data mining | p. 377
