The heterogeneous tool set, HETS p. 519
Searching for shapes in cryptographic protocols p. 523
Automatic analysis of the security of XOR-based key management schemes p. 538
State of the union: type inference via Craig interpolation p. 553
Hoare logic for realistically modelled machine code p. 568
VCEGAR: verilog CounterExample guided abstraction refinement p. 583
Alloy analyzer+PVS in the analysis and verification of alloy specifications p. 587
Combined satisfiability modulo parametric theories p. 602
A Grobner basis approach to CNF-formulae preprocessing p. 618
Kodkod: a relational model finder p. 632
Bounded reachability checking of asynchronous systems using decision diagrams p. 648
Model checking on trees with path equivalences p. 664
Uppaal/DMC - abstraction-based heuristics for directed model checking p. 679
Distributed analysis with [μ]CRL: a compendium of case studies p. 683
A generic framework for reasoning about dynamic networks of infinite-state processes p. 690

Unfolding concurrent well-structured transition systems p. 706
Regular model checking without transducers (on efficient verification of parameterized systems) p. 721
