Justified and common knowledge: limited conservativity p. 1
The intensional Lambda calculus p. 12
Generalized non-deterministic matrices and (n,k)-ary quantifiers p. 26
Elementary differential calculus on discrete and hybrid structures p. 41
Weighted distributed systems and their logics p. 54
Weighted O-minimal hybrid systems are more decidable than weighted timed automata! p. 69

On decidability and expressiveness of propositional interval neighborhood logics p. 84
Reasoning about sequences of memory states p. 100
Cut elimination in deduction modulo by abstract completion p. 115
Density elimination and rational completeness for first-order logics p. 132
Extracting the resolution algorithm from a completeness proof for the propositional calculus p. 147
Topological semantics and bisimulations for intuitionistic modal logics and their classical companion logics p. 162

A decidable temporal logic of repeating values p. 180
Model checking knowledge and linear time: PSPACE cases p. 195
Realizations and LP p. 212
Successive abstractions of hybrid automata for monotonic CTL model checking p. 224
Explicit proofs in formal provability logic p. 241
A synthesis algorithm for hybrid systems p. 254
Including the past in 'topologic' p. 269
A note on rewriting proofs and Fibonacci numbers p. 284
On complexity of Ehrenfeucht-Fraisse games p. 293

The law of the iterated logarithm for algorithmically random Brownian motion p. 310
Hypersequent calculus for intuitionistic logic with classical atoms p. 318
Proof identity for classical logic: generalizing to normality p. 332
On the constructive Dedekind reals: extended abstract p. 349
Verifying balanced trees p. 363
Compactness properties for stable semantics of logic programs p. 379
Uniform circuits, & Boolean proof nets p. 401
Finite automata presentable Abelian groups p. 422

Embeddings into free Heyting algebras and translations into intuitionistic propositional logic p. 437

Some puzzles about probability and probabilistic conditionals p. 449
A temporal dynamic logic for verifying hybrid system invariants p. 457
Multiplexor categories and models of soft linear logic p. 472

Until-since temporal logic based on parallel time with common past: deciding algorithms p. 486

Total public announcements p. 498
