A sketch-based interface for modeling myocardial fiber orientation p. 1
NPR lenses : interactive tools for non-photorealistic line drawings p. 10
A sketch-and-spray interface for modeling trees p. 23
Sketching-out virtual humans : a smart interface for human modelling and animation p. 36
A novel human computer interaction paradigm for volume visualization in projection-based virtual environments p. 49
Intelligent third-person control of 3D avatar motion p. 61
Highly realistic 3D presentation agents with visual attention capability p. 73
Adaptation of graphics and gameplay in fitness games by exploiting motion and physiological sensors p. 85
Correlating text and images : concept and evaluation p. 97
Lighting-by-example with wavelets p. 110
Semantic information and local constraints for parametric parts in interactive virtual construction p. 124
Artistic 3D object creation using artificial life paradigms p. 135
Data-embeddable texture synthesis p. 146
Tile-based modeling and rendering p. 158
Visualization of uncertainty and reasoning p. 164
DIVA : an automatic music arrangement technique based on impression of images p. 178
Multi-modal interface for fluid dynamics simulations using 3-D localized sound p. 182
Focus+context resolution adaption for autostereoscopic displays p. 188
Feature extraction from the mesh model with some noise p. 194
Effects of space design visualization on users' subjective states p. 200
Multi-view sketch-based FreeForm modeling p. 204
Jigsaw texture synthesis p. 210
Synthesis of dancing character motion from beatboxing sounds p. 216
Sketch-based virtual human modelling and animation p. 220
Perceptually adaptive rendering of immersive virtual environments p. 224
Customized slider bars for adjusting multi-dimension parameter sets p. 230
Magical tile p. 233
Invisible shape : subjective surface p. 235
