Architectural Description Languages
Architecting Dependable Systems with the SAE Architecture Analysis and Description Language (AADL) p. 1
A System Dependability Modeling Framework Using AADL and GSPNs p. 14
Towards Improving Dependability of Automotive Systems by Using the EAST-ADL Architecture Description Language p. 39
The View Glue p. 66
Architectural Components and Patterns
A Component-Based Approach to Verification and Validation of Formal Software Models p. 89

A Pattern-Based Approach for Modeling and Analyzing Error Recovery p. 115
Architectural Fault Tolerance Using Exception Handling p. 142
Model-Centric Development of Highly Available Software Systems p. 163
An Outline of an Architecture-Based Method for Optimizing Dependability Attributes of Software-Intensive Systems p. 188
Architecting Distributed Systems
A Distributed Monitoring System for Enhancing Security and Dependability at Architectural Level p. 210
Architecting Dynamic Reconfiguration in Dependable Systems p. 237
Ecotopia: An Ecological Framework for Change Management in Distributed Systems p. 262
Generic-Events Architecture: Integrating Real-World Aspects in Event-Based Systems p. 287
Flexible Communication Architecture for Dependable Time-Triggered Systems p. 316
Business Process Monitoring for Dependability p. 337
Architectural Assurances for Dependability
Achieving Dependable Systems by Synergistic Development of Architectures and Assurance Cases p. 362
Towards Evidence-Based Architectural Design for Safety-Critical Software Applications p. 383
Extending Failure Modes and Effects Analysis Approach for Reliability Analysis at the Software Architecture Design Level p. 409

Author Index p. 435
