State of the Art
The Modeling Power of the Periodic Event Scheduling Problem: Railway Timetables-and Beyond p. 3
Cyclic Railway Timetabling: A Stochastic Optimization Approach p. 41
Timetable Information: Models and Algorithms p. 67
Estimates on Rolling Stock and Crew in DSB S-tog Based on Timetables p. 91
A Capacity Test for Shunting Movements p. 108
Railway Crew Pairing Optimization p. 126
Integer Programming Approaches for Solving the Delay Management Problem p. 145
Decision Support Tools for Customer-Oriented Dispatching p. 171
Proceedings of ATMOS 2004
An Integrated Methodology for the Rapid Transit Network Design Problem p. 187
A Simulation Approach of Fare Integration in Regional Transit Services p. 200
Intelligent Train Scheduling on a High-Loaded Railway Network p. 219
Platform Assignment p. 233
Finding All Attractive Train Connections by Multi-criteria Pareto Search p. 246
The Railway Traveling Salesman Problem p. 264
Rotation Planning of Locomotive and Carriage Groups with Shared Capacities p. 276
An Estimate of the Punctuality Benefits of Automatic Operational Train Sequencing p. 295
Online Delay Management on a Single Train Line p. 306
Author Index p. 321
