Invited Speaker: Andrei Sabelfeld

Dimensions of Declassification in Theory and Practice (Invited Talk) p. 1

Program Security
A Static Birthmark of Binary Executables Based on API Call Structure p. 2
Compiling C Programs into a Strongly Typed Assembly Language p. 17
Information Flow Testing: The Third Path Towards Confidentiality Guarantee p. 33

Short Papers on Computer Security
Large Scale Simulation of Tor: Modelling a Global Passive Adversary p. 48
Privacy Enhancing Credentials p. 55
Browser Based Agile E-Voting System p. 62
Risk Balance in Exchange Protocols p. 70
Scalable DRM System for Media Portability p. 78
Computational Semantics for Basic Protocol Logic - A Stochastic Approach p. 86

Access Control
Management Advantages of Object Classification in Role-Based Access Control (RBAC) p. 95

An Integrated Model for Access Control and Information Flow Requirements p. 111
Digital Rights Management Using a Master Control Device p. 126

Invited Speaker: Joshua Gutman

How to do Things with Cryptographic Protocols (Invited Talk) p. 142

Protocols
A Formal Analysis for Capturing Replay Attacks in Cryptographic Protocols p. 150
Secure Verification of Location Claims with Simultaneous Distance Modification p. 181

Invited Speaker: Kazuhiko Kato

Modeling and Virtualization for Secure Computing Environments (Invited Talk) p. 196

Intrusion Detection
Empirical Study of the Impact of Metasploit-Related Attacks in 4 Years of Attack Traces p. 198

A Logical Framework for Evaluating Network Resilience Against Faults and Attacks p. 212
Masquerade Detection Based Upon GUI User Profiling in Linux Systems p. 228

Short Papers on Network Security
One-Time Receiver Address in IPv6 for Protecting Unlinkability p. 240
A Comprehensive Approach to Detect Unknown Attacks Via Intrusion Detection Alerts p. 247

Combining Heterogeneous Classifiers for Network Intrusion Detection p. 254
Managing Uncertainty in Access Control Decisions in Distributed Autonomous Collaborative Environments p. 261
Safe Execution
On Run-Time Enforcement of Policies p. 268
Static vs Dynamic Typing for Access Control in Pi-Calculus p. 282
A Sandbox with a Dynamic Policy Based on Execution Contexts of Applications p. 297
