Invited Talks

Quantum Random Walks - New Method for Designing Quantum Algorithms  p. 1
Social Information Access: The Other Side of the Social Web  p. 5
Designing Adaptive Web Applications  p. 23
Best of Both: Using Semantic Web Technologies to Enrich User Interaction with the Web and Vice Versa  p. 34
On the Hardness of Reoptimization  p. 50
Describing Self-assembly of Nanostructures  p. 66
On the Undecidability of the Tiling Problem  p. 74
Remote Entrusting by Run-Time Software Authentication  p. 83
Trusted Computing - Special Aspects and Challenges  p. 98
Optimizing Winning Strategies in Regular Infinite Games  p. 118

Foundations of Computer Science

Recursive Domain Equations of Filter Models  p. 124
Algorithmic Problems for Metrics on Permutation Groups  p. 136
Periodic and Infinite Traces in Matrix Semigroups  p. 148
From Asynchronous to Synchronous Specifications for Distributed Program Synthesis  p. 162

Exact OBDD Bounds for Some Fundamental Functions (Extended Abstract)  p. 174
Clustering-Based Similarity Search in Metric Spaces with Sparse Spatial Centers  p. 186
A Useful Bounded Resource Functional Language  p. 198
On Reachability Games of Ordinal Length  p. 211
An Algorithm for Computation of the Scene Geometry by the Log-Polar Area Matching Around Salient Points  p. 222

The Power of Tokens: Rendezvous and Symmetry Detection for Two Mobile Agents in a Ring  p. 34

How Much Information about the Future Is Needed?  p. 247
On Compiling Structured Interactive Programs with Registers and Voices  p. 259
Optimal Orientation On-Line  p. 271
Some Tractable Instances of Interval Data Minmax Regret Problems: Bounded Distance from Triviality  p. 280
Assisted Problem Solving and Decompositions of Finite Automata  p. 292
Energy-Efficient Windows Scheduling  p. 304
A New Model to Solve the Swap Matching Problem and Efficient Algorithms for Short Patterns  p. 316
Certification of Proving Termination of Term Rewriting by Matrix Interpretations  p. 328
Extension of Rescheduling Based on Minimal Graph Cut  p. 340
Deriving Complexity Results for Interaction Systems from I-Safe Petri Nets  p. 352
Computing Longest Common Substring and All Palindromes from Compressed Strings  p. 364
Basic Sets in the Digital Plane  p. 376
Algebraic Optimization of Relational Queries with Various Kinds of Preferences  p. 388
Mortality Problem for 2 x 2 Integer Matrices  p. 400
Element Distinctness and Sorting on One-Tape Off-Line Turing Machines  p. 406
