Introduction
Methodology and concepts for SIA
An overview of the Statistical Implicative Analysis (SIA) development
CHIC: Cohesive Hierarchical Implicative Classification
Assessing the interestingness of temporal rules with Sequential Implication Intensity
Application to concept learning in education, teaching, and didactics
Student's Algebraic Knowledge Modelling: Algebraic Context as Cause of Student's Actions
The graphic illusion of high school students
Implicative networks of student's representations of Physical Activities
A comparison between the hierarchical clustering of variables, implicative statistical analysis and confirmatory factor analysis
Implications between learning outcomes in elementary bayesian inference
Personal Geometrical Working Space: a Didactic and Statistical Approach
A methodological answer in various application frameworks
Statistical Implicative Analysis of DNA microarrays
On the use of Implication Intensity for matching ontologies and textual taxonomies
Modelling by Statistic in Research of Mathematics Education
Didactics of Mathematics and Implicative Statistical Analysis
Using the Statistical Implicative Analysis for Elaborating Behavioral Referentials
Fictitious Pupils and Implicative Analysis: a Case Study
Identifying didactic and sociocultural obstacles to conceptualization through Statistical Implicative Analysis
Extensions to rule interestingness in data mining
Pitfalls for Categorizations of Objective Interestingness Measures for Rule Discovery
Inducing and Evaluating Classification Trees with Statistical Implicative Criteria
On the behavior of the generalizations of the intensity of implication: A data-driven comparative study
The TVpercent principle for the counterexamples statistic Ricco Rakotomalala
User-System Interaction for Redundancy-Free Knowledge Discovery in Data
Fuzzy Knowledge Discovery Based on Statistical Implication Indexes
