

List of Reviewers	p. xv
List of Contributors	p. xix
LBS and TeleCartography II: About the book	p. 1
A Series of Symposia on LBS and TeleCartography	p. 1
Progression of Research	p. 3
Structure of the Book	p. 6
Summary	p. 8
Modelling	p. 9
A Formal Model for Mobile Map Adaptation	p. 11
Introduction	p. 12
Use Case and Problem Statement	p. 13
Related Work	p. 16
A Conceptual Model for Mobile Map Adaptation	p. 18
Application and Formal Model	p. 22
Discussion	p. 29
Conclusions and Future Work	p. 30
Using Activity Theory to Identify Relevant Context Parameters	p. 35
Introduction	p. 35
What's Context?	p. 37
A Method Based on Activity Theory (AT)	p. 37
Context-Aware Pedestrian Wayfinding Services	p. 42
Conclusions and Future Work	p. 44
Congestion Visualization Based on Probe Vehicle Data	p. 47
Introduction	p. 47
Methodology	p. 49
Results and Discussions	p. 53
Conclusions	p. 60
Where do you Roll Today? Trajectory Prediction by SpaceRank and Physics Models	p. 63
Introduction	p. 63
Related Work	p. 64
Trajectory Prevision	p. 68
Preliminary Evaluation	p. 73
Conclusions and Future Work	p. 77
Ways of Walking - Developing a Pedestrian Typology for Personalised Mobile Information Systems	p. 79
Introduction	p. 80
Pedestrian Behaviour Monitoring	p. 80
Current Triangulation Approach	p. 81
Heuristic Phase	p. 82
Results	p. 84
Discussion and Comparison of Results	p. 89
Outlook: Deductive Phase	p. 91

Conclusions	p. 92
Mapping Pedestrian Movement: Using Tracking Technologies in Koblenz	p. 95
Introduction	p. 95
Research	p. 98
Results	p. 100
Conclusions and Evaluation	p. 111
Concluding Remarks	p. 115
TeleCartography	p. 119
Evaluation of User Variables in Topographic Feature Recall for the Informed Selection of Personalized Landmarks	p. 121
Introduction	p. 121
Related Work	p. 122
User-Questionnaire - Planning and Performing	p. 125
Data Analysis	p. 128
Conclusions and Outlook	p. 133
Measuring the Impact of Location-Awareness in the Acceptance of Mobile Systems	p. 137
Introduction	p. 137
Technology Acceptance Model	p. 141
Protected Area's Information System Acceptance Model	p. 145
Results	p. 147
Conclusions	p. 152
Impact of Restricted Display Size on Spatial Knowledge Acquisition in the Context of Pedestrian Navigation	p. 155
Introduction	p. 155
Spatial Cognition and Wayfinding	p. 156
Methodology	p. 158
Results and Interpretation	p. 160
Conclusions and Outlook	p. 165
User Requirements for Location-Based Services to Support Hiking Activities	p. 167
Introduction	p. 168
Materials and Methods	p. 170
Results	p. 174
Discussion	p. 180
Summary	p. 182
Geo-Identification and Pedestrian Navigation with Geo-Mobile Applications: How Do Users Proceed?	p. 185
Introduction	p. 186
Personal Geo-Identification in an Unfamiliar Area	p. 187
The Experiment	p. 189
Mobile Observation and Thinking Aloud in the Field	p. 196
Results and Analysis	p. 199
Conclusions	p. 203

Neo-Cartographic Influence on Map Communication in LBS	p. 207
Introduction	p. 207
Neo-Cartography	p. 208
Metamorphosis of the Communication Model	p. 209
Relations and Main Factors in a Conceptual Mass-Communication	p. 211
The Differentiation of Media in Neo-Cartography	p. 213
One Crucial Aspect of Visual Geo-Media Techniques in Neo-Cartography	p. 214
A Common Relevance for Geospatial Communication in Neo-Cartography?	p. 215
Conclusions	p. 217
Location Based Services and Applications	p. 221
The Adoption of Mobile Location-Aware Systems for Field Police Work: Evaluation of a Pilot Initiative at the Dutch Police	p. 223
Introduction	p. 224
Background Literature	p. 224
Description of the New PDA Applications	p. 225
Research Design and Data Collection	p. 227
Findings	p. 230
Conclusions	p. 237
Enhancing the Experience of the Landscape: The Digital Dowsing Rod	p. 239
Introduction	p. 239
The Concept of the Digital Dowsing Rod	p. 241
Digital Dowsing Rod Framework	p. 243
User Acceptance Test	p. 248
Spatial Behavior	p. 258
Discussion and Conclusions	p. 258
MNISIKLIS: Indoor Location Based Services for All	p. 263
Introduction	p. 263
Related Work	p. 264
System Architecture and Implemented Services	p. 265
Positioning Subsystem	p. 267
Middleware	p. 271
User Interaction Subsystem	p. 276
Conclusions and Future Work	p. 280
geoHealth Monitoring - Real-Time Monitoring for Action Forces During Disaster Operations	p. 283
Introduction	p. 284
Intra System Communication	p. 285
Sensor	p. 286
Embedded System	p. 288
Command and Control Client	p. 291
Advantages/Disadvantages	p. 298
Conclusions	p. 299

Modelling Home and Work Locations of Populations Using Passive Mobile Positioning Data	p. 301
Introduction	p. 301
Theoretical Framework	p. 302
Data and Methods	p. 304
Results	p. 306
Discussion and Conclusions	p. 313
A Geographical Information System for Real Estate (GEOVAL)	p. 317
Introduction	p. 318
GIS Applications for Real Estate	p. 319
The GEOVAL System	p. 321
Conclusions	p. 326
Positioning and Sensor Fusion	p. 331
Quality Assurance/Quality Control Analysis of Dead Reckoning Parameters in a Personal Navigator	p. 333
Introduction	p. 334
Introduction to QA/QC Analysis	p. 336
QA/QC Analysis	p. 337
Performance Analysis	p. 343
Conclusions and Future Work	p. 349
Efficient Overlay Mediation for Mobile Location-Based Services	p. 353
Introduction	p. 353
Related Work	p. 354
Overlay-Based LBS Design	p. 356
Analytic Study to Query Overhead	p. 359
Simulation Scenarios	p. 364
Conclusions	p. 370
Three-Dimension Indoor Positioning Algorithms Using an Integrated RFID/INS System in Multi-storey Buildings	p. 373
Introduction	p. 374
3D RFID Positioning Algorithm	p. 375
Integrated RFID/INS Positioning Algorithm	p. 378
Experiments and Analysis	p. 381
Conclusions	p. 384
Prediction of GNSS Availability and Accuracy in Urban Environments - Case Study Schiphol Airport	p. 387
Introduction	p. 388
Line-Of-Sight Computations	p. 389
GNSS Availability	p. 392
GNSS Dilution of Precision	p. 400
Conclusions	p. 404
An Investigation of the Signal Performance of the Current and Future GNSS in Typical Urban Canyons in Australia Using a High Fidelity 3D Urban Model	p. 407

Introduction	p. 408
The Development of a High Fidelity 3D Urban Model	p. 409
GNSS Performance Simulation	p. 413
Conclusions	p. 419
Using RFID and INS for Indoor Positioning	p. 421
Introduction	p. 421
Positioning Using Active RFID	p. 423
Determination of the Trajectory Using INS	p. 429
Experimental Results	p. 433
Summary	p. 437
GPS/WiFi Real-Time Positioning Device: An Initial Outcome	p. 439
Introduction	p. 439
Developing and Testing the WiFi Positioning Algorithm	p. 440
GPS-WiFi Integration	p. 447
Conclusions	p. 455
