Invited Papers

Inter-enterprise System and Application Integration: A Reality Check p. 3

The 4 x 4 Semantic Model: Exploiting Data, Functional, Non-functional and Execution Semantics Across Business Process, Workflow, Partner Services and Middleware Services Tiers p. 16

Challenges in Business Process Analysis p. 27

Information Logistics in Networked Organizations: Selected Concepts and Applications p. 43

Service-Oriented Architecture: One Size Fits Nobody p. 55

Introducing an IT Capability Maturity Framework p. 63

Databases and Information Systems Integration p. 81

Incremental Transformation of Business Software p. 95

ERP Implementation Costs: A Preliminary Investigation p. 108

Enhancing Middleware Functionality by Virtualizing Adapters p. 121

On Handling One-to-Many Transformations in Relational Systems p. 137

Artificial Intelligence and Decision Support Systems p. 148

Key Elements Extraction in Online Collaborative Environments p. 173

Automatic Knowledge Acquisition and Integration Technique: Application to Large Scale Taxonomy Extraction and Document Annotation p. 187

Solving Airline Operations Problems Using Specialized Agents in a Distributed Multi-Agent System p. 199

Information Systems Analysis and Specification p. 212

Case Handling Systems as Product Based Workflow Design Support p. 225

Performing Business Process Redesign with Best Practices: An Evolutionary Approach p. 240

Flexible Information Systems Development: Designing an Appropriate Methodology for Different Situations p. 254

From User Context States to Context-Aware Applications p. 266

A Balanced Approach to Developing the Enterprise Architecture Practice p. 276

A Business Process Modeling and Simulation Method Using DEMO p. 286

Shaping Mobile Applications for the Future p. 303

Linking Requirements to EIS Specifications Using Correspondence Rules p. 316

A Property-Driven Approach to Formal Verification of Process Models p. 328

Software Agents and Internet Computing p. 341

Bid Formation in a Combinatorial Auction for Logistics Services p. 357

A Fuzzy Logic Based Approach to Improve Cataloguing and Searching in e-Commerce Portals p. 366

Summarizing Structured Documents through a Fractal Technique p. 381

A Service Oriented Collaborative Distributed Learning Object Management System p. 394

Human-Computer Interaction p. 407

A We-Centric Telecom Service for Police Officers to Support Communication p. 420

Recognition of Human Voice Utterances from Facial Surface EMG without Using Audio Signals p. 433
