Invited Talks

Association Analysis Techniques for Bioinformatics Problems  p. 1
Analyzing and Interrogating Biological Networks (Abstract)  p. 14
From Architecture to Function (and Back) in Bio-networks  p. 16
A New Machine Learning Approach for Protein Phosphorylation Site Prediction in Plants  p. 18

Assembly of Large Genomes from Paired Short Reads  p. 30
Amino Acid Classification and Hash Seeds for Homology Search  p. 44
Genotype and Haplotype Reconstruction from Low-Coverage Short Sequencing Reads  p. 52
Gene Networks Viewed through Two Models  p. 54
Identifying Evolutionarily Conserved Protein Interaction Modules Using GrahHopper  p. 67

The 2-Interval Pattern Matching Problems and Its Application to ncRNA Scanning  p. 79

Referred Papers

RNA Pseudoknot Folding through Inference and Identification Using TagRNA  p. 90
Comparing Bacterial Genomes by Searching Their Common Intervals  p. 102
Generalized Binary Tanglegrams: Algorithms and Applications  p. 114
Three-Dimensional Multimodality Modelling by Integration of High-Resolution Interindividual Atlases and Functional Maldi-ims Data  p. 126
Detecting Motifs in a Large Data Set: Applying Probabilistic Insights to Motif Findings  p. 139

A Biclustering Method to Discover Co-regulated Genes Using Diverse Gene Expression Datasets  p. 151
Computational Protocol for Screening GPI-anchored Proteins  p. 164
Towards Large-Scale Molecular Dynamics Simulations on Graphics Processors  p. 176
An Agent-Based Model of Solids Tumor Progression  p. 187
Deciphering Drug Action and Escape Pathways: An Example on Nasopharyngeal Selection of Multiple SNPs in Case-Control Association Study Using a Discretized Network Flow Approach  p. 199

Biclustering Expression Data Based on Expanding Localized Substructures  p. 224
Constrained Fisher Scores Derived from Interaction Profile Hidden Markov Models  p. 236
Improving Protein to Protein Interaction Prediction  p. 248

Physicochemical Encoding

The Impact of Gene Selection on Imbalanced Microarray Expression Data  p. 259
Spatial Information and Boolean Genetic Regulatory Networks  p. 270
Modeling of Genetic Regulatory Network in Stochastic $\omega$-Calculus  p. 282
fMRI Activation Detection by MultiScale Hidden Markov Model  p. 295

Simplifying Determination of Genotype and Haplotype Probabilities in Outbred Populations Using Markov Models Carl Nettelblad Sverker Holmgren, Lucy Crooks and &Ouml;Mlet;rian Carlbarg  p. 307

A Comprehensive Analysis Workflow for Genome-Wide Screening Data from ChIP-Sequencing Experiments Hatice A Fitness Distance Correlation Measure for Evolutionary Trees  p. 331

Alignment and Analysis of Closely Related Genomes  p. 343
