Sustaining Informatics Education by Contests (Invited Talk) p. 1
Impasse, Conflict, and Learning of CS Notions (Invited Talk) p. 13
K-12 Computer Science: Aspirations, Realities, and Challenges (Invited Talk) p. 22
Perspective on Computer Science Education (Invited Talk) p. 35
Didactics of Introduction to Computer Science in High School p. 36
Software Design Course for Leading CS In-Service Teachers p. 49
The Effect of Tangible Artifacts, Gender and Subjective Technical Competence on Teaching Programming to Seventh Graders p. 61
The Difficulty of Programming Contests Increases p. 72
Didactic Games for Teaching Information Theory p. 86
Collaborative Initiatives for Promoting Computer Science in Secondary Schools p. 100
Teaching Public-Key Cryptography in School p. 112
Towards a Methodical Approach for an Empirically Proofed Competency Model p. 124
Having Fun with Computer Programming and Games: Teacher and Student Experiences p. 136
Showing Core-Concepts of Informatics to Kids and Their Teachers p. 143
Object-Oriented Modeling of Object-Oriented Concepts: A Case Study-in Structuring an Educational Domain p. 155
Programming Camps: Letting Children Discover the computer Science p. 170
Mission to Mars - A Study on Naming and Referring p. 182
Long-Term Development of Software Projects - Students' Self-appreciation and Expectations p. 194
Author Index p. 207
