Invited Talks

Can Research-Based Technology Change School-Based Learning? Perspectives from Singapore  p. 1

Modeling Emotion and Its Expression  p. 2

Active Learning in Technology-Enhanced Environments: On Sensible and Less Sensible Conceptions of "Active" and Their Instructional Consequences  p. 3

Riding the Third Wave  p. 4

Social and Caring Tutors: ITS 2010 Keynote Address  p. 5

Educational Data Mining 1

Predicting Correctness of Problem Solving in ITS with a Temporal Collaborative Filtering Approach  p. 15

Detecting the Moment of Learning  p. 25

Comparing Knowledge Tracing and Performance Factor Analysis by Using Multiple Model Fitting Procedures  p. 35

Natural Language Interaction 1

Automatic Question Generation for Literature Review Writing Support  p. 45

Characterizing the Effectiveness of Tutorial Dialogue with Hidden Markov Models  p. 55

Exploiting Predictable Response Training to Improve Automatic Recognition of Children's Spoken Responses  p. 65

ITS in Ill-Defined Domains

Leveraging a Domain Ontology to Increase the Quality of Feedback in an Intelligent Tutoring System  p. 75

Modeling Long Term Learning of Generic Skills  p. 85

Eliciting Informative Feedback in Peer Review: Importance of Problem-Specific Scaffolding  p. 95

Inquiry Learning

Layered Development and Evaluation for Intelligent Support in Exploratory Environments: The Case of Microworlds  p. 105

The Invention Lab: Using a Hybrid of Model Tracing and Constraint-Based Modeling to Offer Intelligent Support in Inquiry Environments  p. 115

Discovering and Recognizing Student Interaction Patterns in Exploratory Learning Environments  p. 125

Collaborative and Group Learning 1

Lesson Study Communities on Web to Support Teacher Collaboration for Professional Development  p. 135

Using Problem-Solving Context to Assess Help Quality in Computer-Mediated Peer Tutoring  p. 145

Socially Capable Conversational Tutors Can be Effective in Collaborative Learning Situations  p. 156

Intelligent Games 1

Facial Expressions and Politeness Effect in Foreign Language Training System  p. 165

Intercultural Negotiation with Virtual Humans: The Effect of Social Goals on Gameplay and Learning  p. 174

Gaming the System

An Analysis of Gaming Behaviors in an Intelligent Tutoring System  p. 184

The Fine-Grained Impact of Gaming (?) on Learning  p. 194
