Invited Talks

Degrees of Security: Protocol Guarantees in the Face of Compromising Adversaries p. 1
Definability in Games p. 19
From Feasible Proofs to Feasible Computations p. 22
Tree Dualities for Constraint Satisfaction p. 32
Ordered Sets in the Calculus of Data Structures p. 34
Abductive, Inductive and Deductive Reasoning about Resources p. 49
Constraint Solving for Program Verification: Theory and Practice by Example p. 51

Contributed Papers

Tableau Calculi for CSL over Minspaces p. 52
A Resolution Mechanism for Prenex Gödel Logic p. 67
Efficient Enumeration for Conjunctive Queries over X-underbar Structures p. 80
A Formalisation of the Normal Forms of Context-Free Grammars in HOL4 p. 95
Automata vs. Logics on Data Words p. 110
Graded Computation Tree Logic with Binary Coding p. 125
Exact Exploration and Hanging Algorithms p. 140
Embedding Deduction Modulo into a Prover p. 155
Exponentials with Infinite Multiplicities p. 170
Classical and Intuitionistic Subexponential Logics Are Equally Expressive p. 185
On Slicewise Monotone Parameterized Problems and Optimal Proof Systems for TAUT p. 200
A Logic of Sequentiality p. 215
Environment and Classical Channels in Categorical Quantum Mechanics p. 230
Formal Theories for Linear Algebra p. 245
Energy and Mean-Payoff Games with Imperfect Information p. 260
Randomisation and Derandomisation in Descriptive Complexity Theory p. 275
Towards a Canonical Classical Natural Deduction System p. 290
Coordination Logic p. 305
Second-Order Equational Logic (Extended Abstract) p. 320
Fibrational Induction Rules for Initial Algebras p. 336
A Sequent Calculus with Implicit Term Representation p. 351
New Algorithm for Weak Monadic Second-Order Logic on Inductive Structures p. 366
The Structural ω-Calculus p. 381
The Isomorphism Problem for ω-Automatic Trees p. 396
Complexity Results for Modal Dependence Logic p. 411
The Complexity of Positive First-Order Logic without Equality II: The Four-Element Case p. 426
On the Computability of Region-Based Euclidean Logics p. 439
Inductive-Inductive Definitions p. 454
Quantified Differential Dynamic Logic for Distributed Hybrid Systems p. 469
Untyping Typed Algebraic Structures and Colouring Proof Nets of Cyclic Linear Logic p. 484
Two-Variable Logic with Two Order Relations (Extended Abstract) p. 499
