Invited Talks
 Analyzing Explicit Information Flow p. 1
 Toward Securely Programming the Internet p. 27
 Attribution of Malicious Behavior p. 28
 Integrity and Verifiability
 Unifying Facets of Information Integrity p. 48
 Determining the Integrity of Application Binaries on Unsecure Legacy Machines Using Software Based Remote Attestation p. 66
 Stamp-It: A Method for Enhancing the Universal Verifiability of E2E Voting Systems p. 81

Web and Data Security
 Strengthening XSRF Defenses for Legacy Web Applications Using Whitebox Analysis and Transformation p. 96
 Coverage Criteria for Automatic Security Testing of Web Applications p. 111
 A Practical Generic Privacy Language p. 125
 Efficient Detection of the Return-Oriented Programming Malicious Code p. 140
 ValueGuard: Protection of Native Applications against Data-Only Buffer Overflows p. 156
 Access Control and Auditing
 Mining RBAC Roles under Cardinality Constraint p. 171
 Specification of History Based Constraints for Access Control in Conceptual Level p. 186
 Abstracting Audit Data for Lightweight Intrusion Detection p. 201
 System Security
 A Persistent Public Watermarking of Relational Databases p. 216
 Security Rules versus Security Properties p. 231
 Protecting and Restraining the Third Party in RFID-Enabled 3PL Supply Chains p. 246
 Author Index p. 261
