Model-Based Security I
Model-Based Refinement of Security Policies in Collaborative Virtual Organisations p. 1
Automatic Conformance Checking of Role-Based Access Control Policies via Alloy p. 15
Security Validation of Business Processes via Model-Checking p. 29
Tools and Mechanisms
On-Device Control Flow Verification for Java Programs p. 43
Efficient Symbolic Execution for Analysing Cryptographic Protocol Implementations p. 58
Predictability of Enforcement p. 73
Web Security
SessionShield: Lightweight Protection against Session Hijacking p. 87
Middleware Support for Complex and Distributed Security Services in Multi-tier Web Applications p. 114
Model-Based Security II
Lightweight Modeling and Analysis of Security Concepts p. 128
A Tool-Supported Method for the Design and Implementation of Secure Distributed Applications p. 142
An Architecture-Centric Approach to Detecting Security Patterns in software p. 156
Security Requirements Engineering
The Security Twin Peaks p. 167
Authorization
Authorization Enforcement Usability Case Study p. 209
Scalable Authorization Middleware for Service Oriented Architectures p. 221
Ideas
Idea: Interactive Support for Secure Software Development p. 248
Idea: Simulation Based Security Requirement Verification for Transaction Level Models p. 264
Author Index p. 273
