Drug resistance assays in leukemias and lymphomas: An introduction
Predictive assays in acute leukemia
Pharmacologic factors involved in the response to chemotherapy: Apparent versus intrinsic drug resistance
MDR1 gene expression: An independent prognostic factor in acute myeloid leukemia
Detection of P-glycoprotein in adult AML
Evaluation of the MDR phenotype of acute non-lymphoblastic leukemia (ANLL)
Multidrug resistance in myelodysplastic syndromes and acute leukemia
In vitro chemosensitivity assay (DiSC assay) and P-glycoprotein (P-170) expression for determining the patient's sensitivity pattern
Immunocytochemical evaluation of the multidrug resistance associated P-170 glycoprotein in responsive multiple myeloma
Western immunoblotting enhanced chemiluminescence (ECL) detection of P-glycoprotein in vinca-alkaloid resistant cell-lines and human leukemic cells
MDR1 gene expression in a multidrug resistant human non-Hodgkin's lymphoma xenograft model
Double labeling flow cytometry analysis of multidrug resistance in leukemias and lymphomas
Clinical impact of P-glycoprotein (PGP)/multidrug resistance (MDR1) and anionic glutathione S-transferase (GSTN) gene expression in non-Hodgkin's lymphoma (NHL)
Characterization of the role of cytosolic glutathione S-transferase in the conjugation of glutathione to melphalan
Biochemical and electrochemical characterization of acquired drug resistance in human lymphatic malignancy
Detection of P-glycoprotein activity in tissue culture and clinical samples using the fluorescent dye rhodamine 123
Non-covalent modulation of topoisomerase II activity and drug sensitivity in human leukemic cells
Cyclosporin A, etoposide and mitoxantrone (C.E.M.), a phase I-II trial in advanced acute leukemia (AL): An intermediate analysis
Clinical modulation of multidrug-resistant multiple myeloma by cyclosporin
Reversal of etoposide resistance with verapamil
Effects of cyclosporin A on sensitivity to and cellular accumulation of daunorubicin in fresh leukemic cells: A preliminary report
Enhanced verapamil-mediated vincristine accumulation in cycling human B-CLL cells
Reversal of MDR1: How to evaluate clinical usefulness of chemosensitizers in vitro
Circumvention of multidrug resistance by addition of calcium/calmodulin antagonists to cytostatic drugs
Reversal of typical multidrug resistance by cyclosporin and its non-immunosuppressive analogue SDZPSC833 in Chinese hamster ovary cells expressing the MDR1 phenotype
Multidrug resistance modification in myeloid leukemias
Chemosensitizing effect of stimulating AML blast cells with myeloid growth factors evaluated with the MTT-assay
Handling requirements to achieve active drugs in in vitro drug sensitivity and resistance assays p. 227
Use of S9 liver microsomes in the DiSC assay to identify drugs requiring activation in vitro p. 257
Cytotoxic chemotherapeutic agents: Effective in vitro probes for the biology of human cancer p. 263
Bioflavonoids: A possible tool in the therapy of acute leukemias p. 271
Use of the MTT-assay for evaluation of chemosensitivity in adult acute myeloid leukemia p. 279
Resistance patterns of anthracycline analogs in acute myeloid leukemia using the MTT assay p. 285
Study of drug combinations in acute myeloid leukemia (AML) using the MTT assay p. 293
Clinical relevance of drug resistance testing with the MTT assay in childhood acute lymphoblastic leukemia (ALL) p. 299
In vitro chemosensitivity of childhood leukemic cells and the clinical value of assay directed therapy p. 313
Is resistance to prednisolone in vitro related to the response to prednisolone in vivo at initial diagnosis in childhood acute lymphoblastic leukemia? A preliminary analysis p. 321
Differences in antileukemic activity and in leukemia type-specific activity of antineoplastic agents in childhood leukemia at initial diagnosis studied with the MTT assay p. 329
Cellular drug resistance in childhood relapsed acute lymphoblastic leukemia p. 337
Treatment of children with poor prognosis relapsed acute lymphoblastic leukemia based on individual drug resistance profiles: Procedure p. 345
Drug resistance testing as a basis for tailored therapy in children with refractory or relapsed acute lymphoblastic leukemia p. 353
A feasibility study of the MTT assay for chemosensitivity testing in non-Hodgkin's lymphoma (NHL) p. 359
Acute myeloid leukemia (AML) sensitivity to antiblastics is predictable by INT assay p. 365
A comparison of two chemosensitivity assays for human acute non-lymphocytic leukemia p. 369
cells
The DiSC assay: 10 years and 2000 tests further on p. 373
The cross-resistance between radiosensitivity and chemosensitivity of fresh human chronic lymphocytic leukemic lymphocytes using the DISC assay p. 385
Preclinical evaluation of cytotoxic drugs using the Rotman fluorescent cytoprint assay p. 393
Drug sensitivity testing of tumor cells from patients with acute leukemia and non-Hodgkin lymphoma using a fluorometric microculture cytotoxicity assay p. 399
A new lymphoma chemosensitivity assay p. 409
Cell culture drug resistance assays in hematologic neoplasms based on the concept of total tumor cell kill p. 415
Index p. 433
