Foreword
Introducing the Book p. 1
Rough Approximation of a Preference Relation in a Pairwise Comparison Table p. 13
Learning Decision Rules from Similarity Based Rough Approximations p. 37
Discovery of Data Patterns with Applications to Decomposition and Classification Problems p. 55
Answering Non-Standard Queries in Distributed Knowledge-Based Systems p. 98
Approximation Spaces, Reducts and Representatives p. 109
Data Mining: A Probabilistic Rough Set Approach p. 127
Soft Processing of Audio Signals p. 147
A Rough Set Approach to Information Retrieval p. 166
Extraction Method Based on Rough Set Theory of Rule-Type Knowledge from Diagnostic Cases of Slope-Failure Danger Levels p. 178
Soft Computing-Based Recognition of Musical Sounds p. 193
Rough Sets in Industrial Applications p. 214
Rough Sets in Economic Applications p. 238
Multistage Rough Set Analysis of Therapeutic Experience with Acute Pancreatitis p. 272
Reduction Methods for Medical Data p. 295
Formalization and Induction of Medical Expert System Rules Based on Rough Set Theory p. 307
Rough Sets for Database Marketing p. 324
A New Halftoning Method Based on Error Diffusion with Rough Set Filtering p. 336
IRIS Revisited: A Comparison of Discriminant and Enhanced Rough Set Data Analysis p. 345
Applications of Rough Patterns p. 369
The Synthesis Problem of Concurrent Systems Specified by Dynamic Information Systems p. 418
Rough Sets and Artificial Neural Networks p. 449
Genetic Algorithms in Decomposition and Classification Problems p. 471
Rough Set Bibliography p. 491
Software Systems
Grobian p. 555
RSDM: Rough sets Data Miner, A System to Add Data Mining Capabilities to RDBMS p. 558
LERS - A Knowledge Discovery System p. 562
TRANCE: A Tool for Rough Data Analysis, Classification, and Clustering p. 566
ProbRough - A System for Probabilistic Rough Classifiers Generation p. 569
The ROSETTA Software System p. 572
RSL - The Rough Set Library p. 577
Rough Family - Software Implementation of the Rough Set Theory p. 581
RoughFuzzyLab - A System for Data Mining and Rough and Fuzzy Sets Based Classification p. 591
