Preface
The Genetics of Childhood Obesity
Childhood Obesity: Nature versus Nurture
Syndromic Obesity
Metabolic and Body Composition of the Obese Child
Energy Metabolism and the Obese Child
Energy Expenditure in Obese Children
Endocrine Aspects of Pediatric Obesity
Insulin Receptors and Obesity
Pulmonary Function in Obese Children
Measurement of Body Composition in Infants
Adipose Tissue and Lipid Metabolism in the Obese Child
Biology of Adipose Tissue and Its Effect on the Treatment of Childhood Obesity
Critical Steps and Hormonal Control of Adipose Cell Differentiation
Morphological and Functional Aspects of Brown Adipose Tissue
Morphological Studies of the Adipocyte Precursor in White Adipose Tissue
Membrane Lipid Modulation in Obesity
Modification of Membrane Fluidity and Antioxidative Activities in Erythrocytes from Obese Children
The Psychology of Childhood Obesity
Psychological Aspects of Childhood Obesity
Classification of Psychological Disorders in Obese Children
Psychosocial Considerations in the Treatment of Childhood Obesity
Treatment of the Obese Child
The Control of Appetite and Food Intake in the Obese Child
Clinical Considerations in the Treatment of Childhood Obesity
Treatment of Childhood Obesity by a Protein-Sparing Diet: A Clinical and Metabolic Study
An Approach to the Treatment of Childhood Obesity
Treatment of the Obese Adolescent
Dietary Fibre in the Treatment of Childhood Obesity
Childhood Obesity in Czechoslovakia: A Therapeutic Approach
Influence of Ketone Bodies on the Oxidative Burst of Polymorpho-nuclear Leukocytes: Implications for the Use of Ketogenic Diets in Obese Children
Prevention of Childhood Obesity
Prevention of Childhood Obesity
The Future of the Obese Child
Subject Index
