A prospective, randomized, controlled trial comparing the results of microdiscectomy under regional and general anesthesia p. 1
Nucleoplasty as an alternative intradiscal therapy: indications and technique p. 7
Surgical procedures and clinical results of endoscopic decompression for lumbar canal stenosis p. 15
Videotape-assisted thoracoscopy (VAT) for anterior release in neuromuscular scoliosis p. 25
Clinical outcomes of microendoscopic discectomy for extraradicular lumbar disc herniation p. 35
Percutaneous vertebroplasty with hydroxyapatite for the treatment of osteoporotic vertebral burst fracture of thoracolumbar spine p. 43
Surgical results of endoscopic discectomy for lumbar disc herniation: three-year follow-up p. 63
Laparoscopy-assisted mini-open lateral approach for anterior lumbar interbody fusion p. 75
Treatment of internal disc derangement by posterior lumbar interbody fusion and posterior instrumentation p. 87
Endoscopic discectomy for extraradicular lumbar disc herniation p. 99
Anterolateral approach to the lumbar spine p. 107
Posterior endoscopic discectomy using as endoscopic lumbar discectomy system developed in Japan p. 117
Intraspinal examination with a spinal fiberscope (myelofiberscope) p. 131
Clinical outcomes of posterior endoscopic discectomy for central disc herniation and posterior endplate lesions in the lumbar spine p. 141
Diagnosis and endoscopic release of the piriformis muscle under local anesthesia for piriformis syndrome p. 149
