Effect of stress jump condition - viscous flow inside a porous spherical shell p. 1
Theoretical analysis of thermal deflection of a thin clamped circular plate p. 13
Computation of some stochastic linear programming problems p. 24
Local image reconstruction from localized projections via multiresolution approach p. 39

On the quasi-static thermal stresses in an annular disc p. 51
Fuzzy control method to find a precise temperature set point for distillation of crude oil in an oil refinery p. 60
Simultaneous radiation - mixed convection heat transfer from a vertical wall in a porous medium p. 74

Internal contextual grammars versus natural languages p. 88
DFA for multiples of a number p. 103
Application of neural network for solving fuzzy multi-objective non-linear programming problems p. 117
Approximate reasoning with OWA operator in an evaluation scheme p. 123
An application of intuitionistic fuzzy bag in multicriteria decision-making p. 133
An inventory model of time-dependent deterioration with linear demand without shortage p. 140

An intelligent technique for knowledge management p. 146
Multi-objective production planning model with probabilistic constraints p. 160
Point set domination and strong point set domination number of graphs p. 176
Special vertices in strong domination p. 185
Differentiability of Boehminas using point values p. 193

On distance hereditary graphs and their generalizations p. 202
Lattice Boltzmann method for complex geometries p. 207
Control of the grinding circuit in cement industry using fuzzy expert systems p. 221
Restrainted domination subdivision number in graphs p. 236

On multiple connectedness of regions visible due to multiple diffuse reflections p. 245
