Impact of interest rate risk on the Spanish banking sector p. 1
Tracking error with minimum guarantee constraints p. 13
Energy markets: crucial relationship between prices p. 23
Tempered stable distributions and processes in finance: numerical analysis p. 33
Transformation kernel estimation of insurance claim cost distributions p. 43
What do distortion risk measures tell us on excess of loss reinsurance with reinstatements? p. 53
Some classes of multivariate risk measures p. 63
Assessing risk perception by means of ordinal models p. 75
A financial analysis of surplus dynamics for deferred life schemes p. 85
Checking financial markets via Benford's law: the S&amp;P 500 case p. 93
Empirical likelihood based nonparametric testing for CAPM p. 103
Lee-Carter error matrix simulation: heteroschedasticity impact on actuarial valuations p. 113
Estimating the volatility term structure p. 123
Exact and approximated option pricing in a stochastic volatility jump-diffusion model p. 133
A skewed GARCH-type model for multivariate financial time series p. 143
Financial time series and neural networks in a minority game context p. 153
Robust estimation of style analysis coefficients p. 163
Managing demographic risk in enhanced pensions p. 173
Clustering mutual funds by return and risk levels p. 183
Multivariate Variance Gamma and Gaussian dependence: a study with copulas p. 193
A simple dimension reduction procedure for corporate finance composite indicators p. 205
The relation between implied and realised volatility in the DAX index options market p. 215
Binomial algorithms for the evaluation of options on stocks with fixed per share dividends p. 225
Nonparametric prediction in time series analysis: some empirical results p. 235
On efficient optimisation of the CVaR and related LP computable risk measures for portfolio selection p. 245
A pattern recognition algorithm for optimal profits in currency trading p. 253
Nonlinear cointegration in financial time series p. 263
Optimal dynamic asset allocation in a non-Gaussian world p. 273
Fair costs of guaranteed minimum death benefit contracts p. 283
Solvency evaluation of the guaranty fund at a large financial cooperative p. 295
A Monte Carlo approach to value exchange options using a single stochastic factor p. 305
