Preface

Current Practice

A comparative analysis of the forecasting process p. 3
A framework for the production of national population forecasts p. 4
Population systems identification p. 6
Population systems description p. 10
Model construction p. 14
Extrapolation p. 18
Execution, documentation and implementation p. 22
Monitoring p. 23
Methods of fertility projections and forecasts p. 27
Conditional or unconditional p. 28
Demographic analysis p. 30
Extrapolations p. 33
Cross-sections p. 38
Expectations and opinions p. 39
Combinations p. 41
International comparison of fertility assumptions p. 49
Past fertility trends p. 50
Projected fertility trends p. 52
Use of variants p. 54
United Nations projections p. 57
Methods of mortality projections and forecasts p. 61
Mortality rates used p. 63
Classification of mortality projection methods p. 64
Projection by extrapolation of age-specific mortality rates p. 64
Projection by reference to a mortality model p. 66
'Target' projection of mortality p. 69
Projection by reference to mortality components p. 70
International comparison of mortality assumptions p. 75
Past mortality trends p. 76
Projected mortality trends p. 79
Use of variants p. 82
United Nations projections p. 83
Methods of external migration projections and forecasts p. 87
Input data used p. 89
Analysis of past trends p. 90
Projection methods p. 93
Simulation models p. 97
International comparison of external migration assumptions p. 105
Usefulness of the questionnaires p. 106
